- 5.0 New Business .....Mori Hosseini, Chair
- 6.0 Adjourn .....Mori Hosseini, Chair

**COMMITTEE ON ACADEMIC, FACULTY AND STUDENT SUCCESS,  
PUBLIC RELATIONS AND STRATEGIC COMMUNICATIONS  
ACTION ITEM AFSSPRSC1  
October 3, 2024**

**SUBJECT:** General Education Courses Annual Review

---

**BACKGROUND INFORMATION**

Pursuant to Board of Governors Regulation 8.005, the Board of Trustees and President must annually review and approve the courses offered by the institution that meet general education course requirements and submit the approved list to the Articulation Coordinating Committee by September 1 of each year. After the University submits the approved list, the Chancellor of the State University System will continue working with the President and Board Chair to review the list and consider adjustments, including potentially reinstating some courses to General Education status.

**PROPOSED COMMITTEE ACTION**

The Committee on Academic, Faculty and Student Success, Public Relations and Strategic Communications is asked to recommend to the Board of Trustees that the following be approved on the Consent Agenda: (1) the above General Education Courses Annual Review and (2) the President's and Board Chair's continued work with the Chancellor regarding potential adjustments to approved General Education list.

**ADDITIONAL COMMITTEE CONSIDERATIONS**

Board of Governors approval is required after being submitted by the Articulation Coordinating Committee.

---

Supporting Documentation Included: Statewide Course Numbering System General Education Course Report

Submitted by: Joseph Glover, Interim Provost and Senior Vice President for Academic Affairs

**Approved by the University of Florida Board of Trustees, October 3, 2024**

---

Morteza "Mori" Hosseini, Chair

---

W. Kent Fuchs, Interim President and Corporate Secretary

This course is centered around two pivotal questions in the realm of modern communication: "How can we communicate effectively in a world with AI?" and "How can AI tools be utilized for effective communication and collaboration for better social decisions?" It aims to explore both the positive potential and the challenges posed by AI in professional/science communication, fostering a balanced and critical understanding of these tools. Emphasizing its interdisciplinary nature, this course explores the impact of AI on social institutions, structures, and processes, highlighting the intersection between technology and social science. Students will engage with key themes, principles, and methodologies used in social and behavioral sciences, applying them to understand and navigate the AI-influenced communication landscape.

This course introduces students to the uses of big data in the social sciences and the theories, methods, and skills needed for considering the uses and social implications of big data in society. Drawing on traditional and applied social science disciplines, this course introduces students to basic approaches, methods, and ethical concerns in understanding the uses (and misuses) of big data. Class discussion and readings will cover examples of social processes at the macro-level (structures, policies), meso-level (institutions, business), and micro-level of individual perceptions and behaviors. This course examines the human implications of the big data revolution: how algorithms and massive data sets enable your social network and improve society while exposing your private life to strangers and reshaping the social compact. This course also includes analyzing how big data is currently being utilized to track and provide insight for solution generation on pressing issues, such as the United Nations 17 Sustainable Development Goals.

This class examines the complex relationship between humans, their food, and the environment that sustains them both. Major themes include plant biology and ecology, plant metabolism and chemistry, agriculture and environmental policies, global trends in population growth, climate change and food security, and how personal and cultural perceptions of food affect trends in consumption and conservation.

This course will explore the history of agricultural innovations while examining their social, political, economic, and environmental consequences within the context of the global food system. Through analysis of how eating evolved, we will formulate ideas on how global food systems will change and function in the future.

Reproductive biology is a branch of life science that studies and nothing spurs the imagination more than quiet contemplation of a new life and sciences ability to alter the course of biological development. We can plan the sex of our children, store gametes for indefinite periods, test for the presence of certain genes during embryo selection, isolate stem cells that generate new transplant tissues, cure diseases by altering genes, bring species back from the brink of extinction, and develop highly efficient food animal systems. These scientific advancements allow us to alter mammalian development in ways unthinkable 20 years ago resulting in vigorous scientific and ethical debates. Discussions will explore the questions – How such things work? Should we permit such things? Do we want to support such efforts? How far are we willing to let the research take us? What policy and ethical guardrails should guide future developments in reproductive science? And, how does a foundational knowledge of applied reproduction influence one’s own analysis of modern hot button issues? Students will gain knowledge in reproductive physiology and endocrinology that will be applied in experiential learning activities throughout this course to further enhance their understanding of basic reproductive functions and understanding of their own reproductive viewpoints. This course will present topics in anatomy, physiology, and biotechnology that relates to livestock breeding management, assisted reproductive techniques, and the human condition.

In this course we will “think with” the virus to make sense of the rapid circulation of ideas, images, stories, people, things, technologies, and capital that characterizes our digital age. We will explore these movements and processes and the meanings and implications they have for people’s everyday lives through an anthropological and interdisciplinary lens. While this course will include a focus on viral phenomena that typically occur on social media, a major aim of this course is to think critically about what the term “going viral” means and examine whether theories of virality and metaphors from the natural sciences can be applied to and help us make sense of contemporary social and cultural phenomena in an increasingly globalized and digital world.

This course utilizes the disciplines of applied physiology, health education, medicine, healthcare economics, and government/public policy to explore the challenges associated with exercise as an everyday lifestyle among Americans. In this class, we will identify and investigate the role various entities (i.e. government, healthcare providers, insurance agencies, pharmaceutical companies) play in fostering exercise behavior.

Exploring the most popular setting for contemporary life, this course investigates urbanity, asking engaging, open-ended questions about culture, values, priorities, and quality of life. With the global population exponentially rising, cities continue to grow and evolve to accommodate life in the 21st century. This course will explore the composition of a city and the design of and life within urban environments, asking questions about the origin of cities, how they are designed and lived in today, and our vision for the future. The course incorporates perspectives and knowledge from a range of disciplines, including architecture, urban planning, urban design, history, and others to expose students to a range of contexts, societies, landscapes, perspectives, and variables that impact urban environments and life within them.

This course addresses the global issue of art crime, which can be studied from many disciplinary perspectives: art history, archaeology, psychology, law, criminology, journalism, philosophy, history, museum studies, and economics. Throughout the semester students will explore the multiple dimensions of art crime, learn the ways in which the problem has evolved since the UNESCO Convention of 1970, and chart best practices going forward. The class will question some of the problem’s fundamental underpinnings, including ideas about ownership and authenticity, western biases inherent in media coverage of the problem, and the limitations of both the nation-state and international law. We will see that the protection of cultural heritage offers many opportunities to foster mutual understanding and economic growth.

How have people in different societies used the supernatural to try to understand and affect the natural world? What objects, words, rituals, and images have they employed to explain and harness the supernatural? Focusing on relationships among the material, textual, experiential, and visual aspects of ancient artifacts related to magic, this course will investigate the ways in which pre-modern Mediterranean societies sought to interact with the supernatural. Following the porous border between magic and religion, it asks how the invisible was visualized and to what purposes. This class uses art historical and anthropological approaches to address how we can learn from images and objects, and focuses on the materiality of ancient magical texts. The course uses objects and images to address fundamental questions related to ancient and modern conceptions of ancient magic: What are the problems for which pre-modern people sought supernatural aid? To whom did they turn for that aid? What belief systems were used in constructing magical artifacts? Who were the practitioners of magic? How was magic understood to work? What are the boundaries between magic and religion? Between magic and science? The answers to those questions can inform our critical and historical understanding of ancient Mediterranean societies and how they created and deployed knowledge.

What impacts (both positive and negative) has technological progress had on our ability to view and appreciate the Cosmos, and on our relationship with the natural world, and how do we best adapt to or mitigate unwanted impacts? Human activity has dramatically increased the brightness of the night sky in much of the world, which has cultural, biological, and scientific impacts. We will take a broad perspective in this course and consider some of the consequences, both intentional and unintended, of technical progress upon our understanding and ability to view the Cosmos.

How can different people can view the same evidence yet form or retain different conclusions? This course introduces students to the concept of inference: the process by which we convert information presented to us into new conclusions or new knowledge. This course asks students to apply inference not just in a scientific context but also to pressing societal issues.

This course will thoroughly investigate some of the most interesting topics in contemporary physics— the arrow of time, irreversibility, quantum mechanics, cosmology—through the lens of big questions. This class is accessible to non-physics majors—indeed, to those with minimal technical background at all—and will focus on the concepts, exploring the key ideas with almost no math. At the same time, we will mix in ideas from philosophy, history, and art that also bear on these questions. This will make the course relevant and exciting both for those who feel a strong affinity with the arts and humanities as well as for those for whom science resonates more.

“Are we alone?” is a question that has always been fundamental to humans, but that only recently has become the subject of empirical science. This course will focus on major scientific developments in biology and astronomy to help us understand the nature and limits of life, the distribution and exploration of habitable environments in the Universe, and the possibility of encountering extraterrestrial life. We will examine how culture, society and religion influence regional policies and regulations regarding life, habitat conservation, space exploration and approach to the question of extraterrestrial life.

This course introduces students to the astronomical events that astronomers identify to be the sites of formation of the heaviest elements in the periodic table, including the radioactive element Uranium. Uranium (U, Z=92) is an infamous element that is one of the heaviest and rarest elements on Earth. It is originally forged via the oldest stars in the Universe, and produced by a process called the r[apid] neutron capture process (r-process) nucleosynthesis event. It also has a rich and complex history on Earth. This course invites students to explore connections between the heavy elements (particularly U) forged in ancient stars and the nuclear weapons that have shaped global politics and local environmental policy over the last few generations. It will allow students to explore how ancient stardust became the key ingredient in the nuclear arms race since the 20th century, and how this story might impact our expectations on the search for extraterrestrial life.

This course provides an overview of anthropogenic climate change and helps students develop an understanding of local and regional resilience and adaptive responses to specific impacts of climate change.

Animal migration is a fascinating and inspiring natural phenomenon, yet around the world, many migrations are in decline, and this rate has accelerated in recent years. Therefore, the pressing questions that this course addresses are: "Is animal migration disappearing? And "Is this a significant issue?" We will focus on a diversity of organisms that journey by air, land, and water to explore the ecological properties and services associated with migrating animals. We will explore the scientific, social, and political challenges to ensure that these migrations do not go extinct. We will learn about the methods used to study migration, cues for migration, variation in migratory life histories and their evolution, and assess how humans affect migrating animals. We will view this pressing question through a scientific lens and multi-disciplinary inquiry, with assignments that employ writing, presentation, data analysis, experiential learning, class discussion, and group work.

Our oceans. They are stunningly beautiful, profoundly impacted by humans, and vitally important to human existence. In this course, we will ask "How do we impact our oceans, and how do they in turn impact us?" We will explore the biodiversity and ecology of our oceans, human impacts on ocean ecosystems, how ocean ecosystems impact humans, and solutions for ecological problems. Thus, this multidisciplinary course will touch on biology, sociology, engineering, and other fields to explore the issue of human impacts on the ocean from many angles.

This course addresses the pressing questions, "How much water do we need, and how do we balance conflicting demands for this critical resource?" We will examine the physical and biological science behind the various stages of the water cycle through lectures and readings, and we will learn about watershed hydrology and the science of environmental flows through online simulations. We will analyze anthropogenic impacts on water resources through participation in a hypothesis-driven experiment testing the influence of stressors on living stream mesocosms, and we will read and discuss local examples of water resource challenges and solutions. We will reflect on our own use of water through recording a water use diary and calculating our water footprint.

Sent SCNS update of course description based upon Articulation Committee description

While the post-Enlightenment world, anchored in science and rational thinking, is convinced that magic does not exist, still beliefs in magic and the supernatural are part of the universal human experience. The study of this universal human experience offers students the opportunity to examine and re-evaluate their understanding of supernatural concepts and how such concepts have been shaping our own reality as individuals and as members of a group or society as a whole. It also presents an excellent opportunity for the examination of beliefs, biases, preconceived stereotypes and approaches in the construction of the "Other", the different, the unfamiliar and exceptional, and for a re-evaluation of the criteria according to which students understand concepts important for our society.

The ability to listen is a key component to our society. Listening is the very first language skill we develop, before speaking, reading or writing. In addition, we use our listening skills more than any other language skill, listening to the equivalent of a book each day. However, despite the fact that listening is the first and most frequent language skill we possess, very few people understand and excel at listening. As a result of poor listening, we suffer from misconceptions, mistakes, and misdiagnoses, which in turn leads to mistrust in our society. This begins with our failure to listen intrapersonally-understanding one's self. It continues through our interpersonal relationships understanding our friends, family and partners. And, as a society, we often fail to reach understanding with each other, especially those who are different from ourselves, primarily due to a lack of listening. This course examines the essential questions of the human condition, as it relates to listening.

In this class, students will deepen their understanding of what it means to be a civically engaged citizen by considering the pressing question: How can communication enhance civic engagement in an ever-changing society? They will do so by critically engaging with historic methods of social movements, models of civic engagement (solidarity, advocacy, political activism, research public interests etc.), and theories regarding public (and interpersonal) rhetoric to better understand the most effective ways to be an engaged citizen. Students will learn about the ways that others have engaged with difficult topics and created social change and consider how they can affect change in their own communities and/or personal lives.

This interdisciplinary Quest 2 course invites students to closely reflect upon and assess the concepts of group belonging, normative influence, group centrism, indoctrination, and patterns of domination and dependency. This course stimulates students to interrogate the communication experiences that define not only their membership in particular organizations and social groups, but also the extent to which that membership has informed their attitudes, beliefs, and values.

This course aims to demystify AI by situating it within a much larger tradition of describing how we communicate with others in the world and the tools we use to do so. Drawing on theories from Communication Studies, Linguistics, Psychology, Anthropology, and Philosophy (among others), we center our understanding of AI around the pressing societal issue of How do we with communicate with AI?

This course investigates how we can promote everyday empathy via social media. This class examines the complex relationship between humans, communication, technology and empathy. This course is multidisciplinary in nature, drawing from psychology, sociology and communication studies.

Given the interconnectedness of society and economy, how does human intervention in the environment in various forms worldwide lead to the destruction of natural resources? A fundamental understanding of how all forms of culture such as consumerism, food systems, transport, and the built environment transforms nature is needed to understand the challenges and opportunities of international sustainable development. This interdisciplinary Quest 2 course provides an understanding of human interventions on the environment in various forms that has led to the appropriation and degradation of natural resources. This course explores the key concepts related to sustainable development worldwide, covers the key environmental and resource issues and effects on humankind if present population and consumption trends remain unchanged, and addresses core questions about culture and nature with a special focus on human interventions on the environment.

This course will grapple with how and where nutrition should fit in an emerging era of precision medicine, by exploring the challenges of malnutrition and the growing epidemic of metabolic disease (e.g., obesity, diabetes, cardiovascular disease, and cancer). Based on the disciplines of molecular science, dietetics, epidemiology, and data analysis (including artificial intelligence), the course will investigate and reflect on the causes and consequences of malnutrition, and how dietary or nutrient choices can be personalized to prevent metabolic disease. Major themes include the molecular determinants of differences among individuals and nutritional contributions, malnutrition and metabolic disorders, and the application of personalized nutrition in disease prevention.

Artificial Intelligence: What is it? What is it used for? What is at stake? How can investigating AI from the perspectives of Art, Science, and Fiction help to uncover the history, present, future, and implications of AI? Each week we will explore AI core concepts from three perspectives: Art, Science, and Fiction. By the end of this course, you will be able to separate the facts from the hype and learn how to leverage fiction to prototype the future. This class is open to any student regardless of technical or creative background. It has an interdisciplinary approach to the history and practice of AI, through an integrated humanities perspective. We look at prose, poetry, fine art, film, music, society, law, policy, and creative coding arts to understand the impact and innovation in the diverse fields of Artificial Intelligence. We will go over key concepts in AI and creative applications of Machine Learning Technologies.

If life is a game, how should we play it? What does it mean to live well? Are games simply diversions from more serious matters, or might they have something to teach us about how we relate to one another (and to ourselves)? A Life Well Played is an introductory-level humanities course examining these and other classic questions of ethics, aesthetics, and politics through the lens of play and games. With readings drawn from philosophy, sociology, art history, and media studies, this course exposes students to a broad range of thinkers and ideas that have been central to the development of contemporary society and its manifold expressions. And yes, we will talk about video games.

This course will examine how far data can take us by exploring a variety of data sets from a variety of disciplines. We will examine large national and international datasets that transcend disciplinary boundaries and include economic, geographic, health, political, and sociological variables. The purpose of this course is to equip students with the basic skills in how to locate data sets, compose descriptive statistics, and provide meaningful analysis of the data using tables and charts. The concepts learned in the course can apply to data from any field.

This class examines the relationship between humans and the environment, with a focus on climate change and emissions policy. Students will study interdisciplinary topics touching the fields of economics, political science, law, science, and marketing. Topics covered include: the science behind climate change (science), perceptions about climate change (marketing), fossil fuel subsidies (economics), approaches to mitigation, adaptation, and geoengineering (economics and engineering), the legal basis for greenhouse gas mitigation in the United States (law) and the political economy of climate change votes in the US government (political science).

This class examines the relationship between humans and the environment, with a focus on climate change and emissions policy. Students will study interdisciplinary topics touching the fields of economics, political science, law, science, and marketing. Topics covered include: the science behind climate change (science), perceptions about climate change (marketing), fossil fuel subsidies (economics), approaches to mitigation, adaptation, and geoengineering (economics and engineering), the legal basis for greenhouse gas mitigation in the United States (law) and the political economy of climate change votes in the US government (political science).

This course will address questions facing society around how, where and why technologies may support under-served groups: specifically, people who are differently abled. The course examines the field of assistive technologies from a range of disciplinary perspectives.

This course focuses on the bidirectional relationship of Artificial Intelligence (AI) and theories of learning. Data, combined with methods of AI, can help us make sense of the learning behaviors that emerge through data generated as teachers and students interact with educational technologies. Similarly, many advancements in AI have resulted from theories, models, and biology related to how humans learn. The usage of digital learning platforms, learner management systems, and other technologies is growing across educational settings. Combining AI with the quality data that has been produced by using these tools can improve both teacher instruction as well as learner experiences. This data can help understand the processes of learning beyond other assessment measures like correctness and be used to inform the development of better technologies and instructional content. Like any system designed for human interaction, the data collected by these systems can be messy, incomplete, and generally ill-suited for AI applications in its raw form. The course will guide students through understanding the data, identifying problems, and examining a broad range of machine learning methods and practices to solve these real-world problems in a range of contexts.

Romantic love is something most people seek out. Yet, despite both the commonality of this experience and the significance of it, romantic love is rarely something we examine intellectually. In addition, both marriage and long-term partnerships are on the decline in the United States, signaling shifting values and commitments related to romantic love. This course is well positioned to help students understand how the concept of romantic love has developed and continues to change, as well as how the manifestations of romantic love vary. With this knowledge students will be better prepared to articulate their own ideas about why, how, and with whom they wish to pursue or defer their quest for romantic love.

In this course we'll explore this question by focusing on the place called Florida, and thinking about how our ideas about Florida inform our understanding of ourselves as individuals and members of a geographical and human community. Floridians have diverse origins and histories and are a representational subset of the US population, and we will consider how the factors such as geography, region, and economic status affect the opportunities for and constraints on Floridians.

You have probably heard it said that we live in a digital world. So how, then, does the digital affect how we live? How does the digital affect our quality of life, our ability to communicate with others, our ability live socially, civically, professionally, personally, and ethically? Digital Literacy and the Humanities explores these questions in order to consider what it means to be digitally "literate" and how digital networks interact with our daily lives and the lives of others. We will explore, for example, the ways in which the digital democratizes and the ways it excludes and divides and how being digitally literate in a digital world impacts the very ways in which we live. Of course, we can ask these kinds of questions from a number of perspectives. This course, though, focuses specifically on the ways in which the Humanities influences how we understand our digital lives. Ultimately, we will ask as how the Humanities might think about to the role of digital literacy in what it means to be human and what we value in our lives.

One of the most pressing issues of our time- how humans are altering the number, relative abundance, and distribution of species on Earth via changing land use, agricultural practices, urbanization, globalization, and climate change and how this is impacting genetics, ecosystems and societies around the world. We will explore the patterns and the processes that have historically governed the distribution of life on Earth as well as utilize methodologies and analyses that scientists have developed to approach the study of biodiversity in both laboratory and field exercises. Through discussion of selected readings and group work on case studies, we will explore how the changes in biodiversity around the world impact critical ecosystem services including nutrient cycling, food production, disease transmission, and culture. We will collect and analyze data on diversity and conduct experiments geared to understanding processes that govern biodiversity. Finally, we will interact with scientists to discuss ways they can interact with community partners to address these issues on a global scale. This class is recommended for students interested in understanding more clearly how we approach answering questions with science, how science is evaluated, and the challenges with using science to create and implement policy when the challenges are global in nature. Students taking this course will be prepared to explore higher level courses in entomology, agronomy, horticulture, plant pathology, soil and water sciences, biology, geography, and wildlife ecology

Arthropod-borne diseases represent some of the most dangerous and major challenges facing human health. They have shaped the course of history and have remained a threat. Everyone has, at one point or the other, been exposed to the nuisance and bites of arthropods and, therefore, potentially to the diseases they may carry. The effects of these arthropod-borne diseases on human health are increasing and spreading. Factors such as the development of resistant parasite strains to the currently available drugs, and the evolution of insecticide resistance to the currently available insecticides account for this increase and spread. Other factors such as constantly changing climate, trade, unplanned urbanization, changes in agricultural practices, and human travel also aid the establishment of these diseases thereby intensifying disease transmission or causing disease emergence in areas where they were previously unknown. This is a multidisciplinary course that covers concepts and topics from the fields of entomology, medicine, public health, biology, parasitology, microbiology, and veterinary medicine, and will address the interactions of arthropods to humans and the environment. It will present pressing issues relating to the impact of arthropods in public health and will also explore challenging questions such as "what are the emerging issues in vector biology and disease epidemiology"? and "what can be done to manage or prevent the occurrence of arthropod-borne diseases"?

The main goal of this course is to examine the complex nature of collective European identities in general and the common "European identity" in particular. Collective identity has become an issue in Europe where public debate is increasingly concerned with the problem of a European identity that is seen as lacking or as needed. This course is designed to examine Europe from a broad variety of disciplines, approaches and perspectives. An important theme of the course is to discuss three core questions "What is Europe(an)?" "Where is Europe?" and "Whither Europe?" and to demonstrate the identity of Europe as a dynamic cultural construct. Students will encounter the following major themes around which the course is organized: linguistic and ethnic identities, religious and intellectual traditions, the scientific and industrial revolution, urbanization and mass entertainment, Europe's discovery of the New World, socio-political developments from the Enlightenment and the French revolution, the major military conflicts of the 20th c., and European Union the first of a new Europe.

Privacy is a concept that is both omnipresent and elusive. Lawyers, economists, political scientists, and philosophers – among others – try to capture its essence. Despite their efforts, the concept of privacy remains in flux: we have too much to study, we know too little about it, and even what we know is too unclear. For this reason, we will seek to clarify a pragmatic approach to privacy and embed it within a broader framework for understanding law, authority, and power. This means that we will establish the boundaries of the concept and look at its applications by using a multi-disciplinary approach grounded in both law and social science.

Sent SCNS update of course description based upon Articulation Committee description

There is more pressure than ever before on our environmental resources: sometimes we find solutions, but sometimes we also generate unintended consequences. At the same time, technological advances are generating ever more amounts of data - also environmental data. Remote sensing, satellite technology, sensor technology, telemetry and data storage ensure that we have biological data over various time and space scales. The challenge arises how we use this data to do good; increase our understanding, find solutions, and avoid unintended consequences. This course addresses the question: can big data save the earth? We will explore complexity in biological and socio-ecological systems, the nature of causality, models and their relation to sustainability and natural resources management. We will connect data science and its tools to biology and ecosystems through project-based enquiry, by exploring and using real-life data sets, asking big questions and answering them.

This course focuses on the pressing question of how to best manage freshwater resources to meet the growing needs of society while maintaining healthy freshwater ecosystems. Successfully addressing water sustainability issues requires fundamental scientific approaches (e.g., from biology, geology, and chemistry) as well as approaches from other disciplines (e.g., environmental policy, economics, and engineering). We will draw from these approaches to inform students' understanding of water sustainability, approaches to managing water resources, and their ecological and economic consequences.

Maps have played a central role in human societies since the beginning of time. In this course, students will learn maps are not neutral representations of reality but powerful tools of communication. Maps exert an enormous amount of influence on a society's political structure, economic system, and imagination of the larger world. Maps are often used to highlight spatial data in informative ways or to help people get from work to the nearest bar. This course studies maps and analyzes their myriad roles in society.

This class explores the global disconnect between humans and the food, water, and natural resource systems on which we depend. This class draws on the fields of agribusiness, ecology, tourism, rural sociology, and economics to explore opportunities in agritourism across the world to reconnect humans with our agri-food-eco systems.

UNIVERSITY OF FLORIDA	GEO	2	XXX		THE FUTURE OF ENERGY	08/08/2024	3		Natural Sciences	Reviewed: Updated	General Education (Institution)	Syllabus Updated	1

We all eat. But why do we eat the way we do? The relationship between consumers with differing preferences and diverse food systems surrounding us has only been complicating, resulting in problems about eating on an international scope. Therefore, the need to better understand the contemporary way of eating, evaluate its economic viability and sustainability, and make informed decisions is pressing. This course is designed to stimulate students from a variety of backgrounds to think creatively and critically about these problems through the lens of economics, supported by cross-disciplinary perspectives, including marketing, nutritional sciences, public health, neuroscience, and agribusiness. This process establishes an understanding of the market forces influencing the decisions of producers and consumers involved in the production, transformation, and distribution of foods in a cross-national context.

social science known as agricultural economics provides a foundation for informed policy decisions about natural resources such as water and land use; or decisions regarding produced and manufactured resources such as food and clothing. Agricultural economists use a variety of modeling tools to consider optimal behaviors, including how we can reconsider linear systems of production into circular and regenerative ecosystems, referred to as a circular economy. A Cost-Benefit Analysis (CBA) is one systems-thinking tool we use for evaluating complex projects and simple decisions, to evaluate and model the pros and cons of economic decisions. CBA can be applied across a broad array of disciplines including agronomy, engineering, geography, education, medicine, law, finance, human factors, psychology, and many others. CBA project managers and thinkers in society evaluate expectations about rewards (from a decision or action), and costs (including long-term repercussions), to achieve desired outcomes. This course addresses the pressing question, "How can we create and sustain circular food system benefits and evaluate intended and unintended impacts to society from our decisions, to optimize use and conservation efficiency of scarce resources?" As an economic policy tool, we collect, analyze, and communicate research results, build consensus among diverse groups (when it is natural for conflicts to arise), and work towards formulating equitable solutions. The goal of this course is to

How can agricultural and environmental policy be used to address emerging food security and environmental threats around the world? This class explores those questions and will focus briefly on the historical development, the current situation, and the future outlook of the food and agriculture sector in various economies globally. Next, the course dives more deeply into the economic and trade environment surrounding agricultural policy, and brings insights from agronomy, environmental science, and international studies. As economies become more integrated globally, the success of the food and agriculture sector will rest upon comparative advantage.

We have become a "band-aid" society—when a social problem crops up like the opioid crisis, the obesity epidemic, or increases in human trafficking, we try to patch it up on the back end instead of heading off the problem from the start. Prevention science seeks to improve the health and well-being of individuals, families, and communities through empirical approaches to prevention and intervention. By looking at root causes of social problems early on, we can leverage prevention science to improve the health and well-being of individuals, families, and communities. This interdisciplinary Quest 2 course will provide you with foundational knowledge in prevention science.

This course will examine several important bacterial and viral STIs and their control strategies and how culture impacts control or prevention strategies. Sexual behavior, culture, and religion are complex topics and this course aims to introduce these topics through the lens of medical geography and examine how these interactions lead to changing geographic patterns of STIs around the world.

The Future of Energy takes the students on a journey through the history of energy use, issues associated with different technologies, and future challenges and opportunities. The course brings up pressing questions such as Is Renewable Energy Always Sustainable? Are Renewable Energies Always a Better Option for the Environment? and What does a future sustainable energy situation look like? And challenges the students to find the answers to these questions via a combination of readings, lectures, discussions and reflection. The course also explores geographic differences between different states, countries and societies, which contributes to shaping the energy landscape now and in the future.

This course explores the question, “How do we tackle the climate change crisis and mitigate its impact on humans?” In addressing this key question, this course will cover the fundamentals of climate change and AI in order to build a deeper understanding of their interplay and explore their social, economic, and ethical ramifications. This course will explore the ever-changing landscape of AI and its intersection with climate change. Students will be exposed to fundamental science in climate change topics and AI methods. This course will integrate topics from multiple disciplines including the geosciences, computer science, engineering, and the social sciences to discuss complex issues at the interface of climate, AI, and their social impacts.

Natural disasters such as earthquakes, volcanoes, hurricanes, and floods have devastating impacts on human lives. This course will use geologic principles to provide a framework for evaluating earthquake and volcanic hazards, explore the limits of our predictive abilities, the challenges of forecasting weather disasters in a changing climate, and the necessity for decision- making despite scientific uncertainty. By analyzing recent and historical disasters, we will explore the interactions of natural and built environments before, during, and after major events. This course lays out the geologic mechanisms behind disasters, as well as the role of key players - scientists, engineers, developers, government officials, reporters, first responders, and the public in disaster preparedness and response.

This course aims to provide a comprehensive view of how the Earth functions as an ever-changing dynamical system. This journey through Earth System science will integrate multiple disciplines that include biology, chemistry, geology, geophysics, hydrology, oceanography and meteorology. Students will learn the origin and dynamics of the great forces that shape the evolution of our planet, from the deep interior to its surface. They will also learn that the Earth is made up of an interconnection of dynamical systems exhibiting complex behaviors at multiple spatial and temporal scales, which are relevant to society.

This course is an introduction to human diseases that have shaped our civilization. Students will learn about significant historic outbreaks, modern diseases that plague our society, and hypothesize what the next pandemic will be. Disease outbreaks today are growing increasingly complex with the many emerging social, political and demographic changes in our population, as well as dynamic changes in animal and vector populations and the environment.

In this course, students will learn how to separate health fact from myth. Health myths persist for various reasons, such as a lack of understanding related to the scientific process, motivated and/or biased reasoning, or poltical, religious, and cultural influences. In this class, we explore health myths related to exercise, food/nutrition, sexual health, mental wellbeing, alternative medicines, and the environment. For each myth, we will examine how this myth came about, the scientific evidence supporting or refuting the myth, and why this myth persists. We will also learn what we can do as mythbusters to help refute health myths through social and traditional media.

This course tries to answer the following pressing questions: How are robots changing our society, and how can we prepare for a future of robots amongst us? It provides hands-on approach that builds a bridge between the engineering and technical aspects of AI with the business applications with a focus on Tourism, Hospitality and Event Management. This course requires no engineering or technical experience. As the course progresses, students will learn the basics of robot and AI technologies, the latest trends and technological advances in Tourism, Hospitality and Event Management and how they can be applied to their field. This course is not about becoming a technical expert, but rather having a foundational understanding of robotics and AI and how it can be positioned to improve efficiency and effectiveness across different fields, regardless of students’ background.

In popular imagination, pirates are most often depicted as robbers, murderers, and outlaws whose violent actions and plundering challenged established power structures. While their exterior actions clearly conflicted with habitual definitions of justice (such as the laws of empires, international law, etc.), an examination of the ulterior logic behind pirates’ actions and their social organization reveals alternative understandings of justice and uncovers particular power dynamics within pirate communities. This course therefore raises a series of questions around the roles that justice and power played in shaping pirate communities and their actions across time and space.

New technologies in crops and medicine are emerging constantly. Other interests profit from manufacturing risk around a scientific consensus supported by siloed factions within traditional and social media that fortify perceptions. This Quest 2 course considers cases of new technology and its implementation, and the movements that were created in response. Students will examine the psychology of information flow, our cognitive mistakes, logical fallacy, elements of argument and how the problems in communicating the science are hampered by the tribal echo chambers of social media. We will then apply these concepts in exploring case studies, from resistance to refrigeration to modern application of molecular medicine to COVID19, to changes in human genetics. The course will outline the scientific method, scholarly publication, and one-off publications that impacted food security and public health. Students will engage debate around several topics and learn communication strategies used in effective (and non-effective) argument. The main question asked is, “Just because we could, does it mean that we should?” as new technologies will be covered in detail, along with their risks and benefits—as well as how to communicate them. The course will allow students to connect with some of the authors of the relevant readings through visits via Zoom.

In this course, we start with the topic of “plant blindness”; after this, we can address the complicated interactions between plants and multiple groups of people, starting with local domestication, how and why they were cultivated, ways in which they were brought to new locations (often across the world from where they originated), and the role of social issues, including fairness and sustainability. The use of money and commerce that followed the rise of civilizations and the phenomenon of surplus played heavily into this tapestry into which we and plants are woven. We will explore ethnohorticulture through the lens of historical context, how crop diversity impacts us today, and implications for sustainable food and other plant product systems of the future.

Students will investigate the theoretical and historical musical elements that elicit emotion. This course explores how music shapes, and is shaped by, human experience by discussing theories of emotion, emotional intelligence, wellbeing, consumerism, and musical film scores. Students will observe their emotional responses to music and analyze the musical elements that elicited that response by actively listening to music compositions of various styles and genres

AI programs, platforms, applications, and services have proliferated over the last two years. In that time, the national conversation—from classrooms to congress—about AI has intensified. Yet, the discourse about AI has tends toward dichotomy and dilemma. In this course, we will study whether conceptualizations of AI and the policies built thereon are reasonably just. To that end, students will learn and apply theory, create and design multimodal content, and evaluate policies across higher education while grappling with our essential question: can AI policies be fair?

This course explores why stories from the past matter. Stories from the past come from the things that have been documented, collected, and curated—the records that have been archived. They provide evidence of our political, cultural, social, and personal lives, telling stories from the past that help us understand systems of power and the perspectives, values, and experiences that have built our world. Using concepts, research methods, and analytical skills from history, cultural studies, and philosophy, we will explore stories as evidence of the past in three ways: How an object evokes the human connections to it, how collections work as archival spaces that determine how and what stories are told, and how archival research reveals stories from the past to expand our understanding of the world today. This course uses anthropological and art historical approaches to explore ancient and modern ideas about magic. The course examines the materiality of ancient magical texts and how people used images and objects to address questions about magic

For every, “Okay, Google” or “Hey, Siri” to help us with tasks, there is the potential for “Help me understand something” and “Help me through something.” Thus, while we have the ability to give AI commands, conversational AI has the power to influence, persuade, and help us grow, all of which have equally interesting and alarming possibilities. In this course, we will examine this while testing our assumptions. By relying on multidisciplinary knowledge from anthropology, art, linguistics, philosophy, professional writing, psychology, rhetoric, and technical writing to develop interdisciplinary skills in creative thinking, critical thinking, collaboration, presentations, public speaking, and research, our work in AI will necessarily bridge the humanities with the technical. To that end, we will begin with the history and theories of rhetoric and AI. Then, we will survey the landscape of AI developers and developments.

The course is built around former Florida Governor Bob Graham’s book America: The Owner’s Manual, and includes special guest lectures by co-author Chris Hand. Using a social science framework to examine and engage in a civic issue critical to Gainesville and the globe, students will explore a pressing challenge in their university community within the national and international context; pursue qualitative and quantitative research questions across disciplines including political science, public policy, history, and economics; engage with local stakeholders; become keen listeners; propose solutions; and communicate those solutions in an op-ed, public testimony, viral video, a TED-like talk or other form of public engagement.

For more than 3000 years, mathematics has been part of the human quest for knowledge and has helped us to understand the world that surrounds us. From ancient civilizations to our modern societies, mathematical discoveries and applications have constantly shaped the way we comprehend our environment and have given us the methodologies for analyzing and explaining our world. Through the centuries, the reach of mathematics has been extended beyond the physical sciences to practically every area of human endeavor, from industry to philosophy, and from art to politics. This multidisciplinary course explores the humanistic side of mathematics and invites students to explore and discover the creative elements that are inherent in it.

The course takes a detailed look at four Atlantic creoles that developed through contact between Europeans and Africans, and the shaping of new identities and traditions. It provides historical and social contextualization of creole languages and cultures through, among others, literature, visual art, film, and songs. Students study the impacts of global forces on Creole cultures and examine the influence of Creole cultures on the global stage; for example, the content and influence of creole music like gumbe in Sierra Leone or reggae in Jamaica, or the impact of Creole writers like Marlon James (Jamaica) on the international literary scene. In this class, students encounter traditions in linguistics, history, literature, music, visual arts, and postcolonial studies, among other disciplines.

The course will explore the complex relationship between culture and architecture, examining how architecture reflects, shapes, and responds to cultural values, beliefs, and practices. Through a combination of readings, discussions, and case studies, students will develop an understanding of the cultural, political, and economic factors that influence designs and the ways in which architecture can both reinforce and challenge cultural norms. Subsequently, this course explores the cultural foundation of built-up areas. How do learners conceptualize the various spaces they operate in? In addition, it explores how buildings shape social and political life as explored by Western scholars.

This course sets out to probe the cultural, social and political functions of horror in relation to moments of historical violence. In addition to exploring the horror genre in literary and cinematic works of the imagination, we will ultimately apply the aesthetic, epistemic and ethical questions arising in horror to shifting representations of traumatic history. As we map out the history and themes behind this popular genre, our aim is to probe the intersections between horror and its socio-cultural and historical contexts. This course investigates the intersection between narrative of horror in the realms of both fantasy and history. In our inquiry into representations of horror, we will examine how this genre in European and American culture is employed to express both individual and national anxieties in the face of political violence. Theoretical readings will embrace a range of disciplines, from literary and film theory to philosophical and psychoanalytic investigations of the all-too-common attraction to the art of fear. Through the exploration of such concepts as the sublime, the uncanny and the abject, we will probe our fascination with these categories. In this course, we will explore how both paid and unpaid domestic labor, including childcare, eldercare, food preparation, and cleaning, has evolved historically from the advent of industrial capitalism through the neoliberal “gig” economy.

In the United States, the rhetoric of the fashion industry informs consumer desire. Even if one does not read fashion magazines, keep current with international fashion weeks, or follow Instagram influencers, one’s clothes buying is influenced by appeals to buy more, even when new garments are not needed. This thoughtless consumerism has consequences. Because the global system of clothing production has no central regulation, nearly every step of the process yields economic, social, and environmental harms. Some companies, including H&M and Zara, claim to have started using more sustainable procedures. Often, though, these claims amount to “greenwashing,” a rhetorical technique used to hide damaging practices. In this course, students will address problems in clothing manufacture and marketing. They will ask the questions “how might consumers write to advocate for sustainable strategies in the fashion industry?” and “to which target readers might consumers communicate their concerns?” In their individual research, students will research one issue and word a research question. Learning research techniques in the social and behavioral sciences, they will conduct survey research in groups.

The possibility of privacy is challenged by the ubiquity of data collection. Increasingly we find ourselves living under surveillance without the means of separating our private from our public lives. In this course we will investigate how specific social structures are being altered or more deeply inscribed through specific uses of aggregate data. Students will learn how to use qualitative research methods from the social sciences to better understand the societal effects of data aggregation and the relationship between concepts of privacy and property.

Analyzes the story of the development of the French language as well as other languages spoken in Francophone states. Examines the evolution of the francien dialect into the French standard language of the modern French state. Examines French varieties, linguistic variation and change, periods of linguistic history, and the empowerment of a language through standardization. Explores the Latinization of Gaul, dialectalization of Gallo-Romance, selection of norms, elaboration of function, codification, acceptance, and maintenance of the powerful standard. Evaluates the story of one other language’s standardization (beside French) in Francophone countries in an essay. Assesses, in a scripted video, the influence of foreign languages (like English) in French websites by means of AI and Machine Translation.

Analyzes historical linguistic change in lexicon, semantics, phonology, morphology, and syntax, articulating traditional and Artificial Intelligence methods of analysis. Examines relatedness between languages, the comparative method, internal reconstruction, the origin and propagation of change, contact and the birth and death of languages, language and prehistory, and the very remote relations between languages. Explores diverse linguistic datasets through AI technologies.

The main goal of this course is to learn how to challenge our most basic assumptions about the role of design in society by examining the intentions and consequences of designed things, whether objects, environments or experiences. We will learn how to grapple with open-ended and complex dilemmas using critical analysis and a creative mindset, mining works for evidence, creating arguments, and articulating ideas. This course will start what we hope becomes a lifelong habit of critically analyzing the intentions behind a design, its likely consequences and the change it might produce. Note: This introductory course was developed for students in all majors to question the role of design and design thinking in society. You do not need to be a design major or have any prior design expertise.

This cross-disciplinary course examines “Why Chemistry Matters” through analysis and discussion of topics (e.g. agriculture, materials, energy, medicine, human health, nature and the environment) represented in two popular public-facing science novels “The Disappearing Spoon” and “Napoleon’s Buttons” – all focused-on aspects of chemical innovations used to tackle problems in society in the past. The course extends these examples to social and political problems of today and the future; asking “How can novel approaches/innovations in chemistry help alleviate or answer current and arising challenges in our world today, such as our food supply and pollution, novel medicines to combat resistance and addiction, and our water supply and the built environment?”, and “How has chemical innovation been motivated by and impacted diverse groups of people?” The answers to these questions will also reveal to students how pervasive chemistry is in their daily lives.

Does the capitalist system erode community or enhance it? That is this course's central question. To answer it we will think comparatively about what allows a society to flourish. This multidisciplinary course examines a range of contemporary concerns over the role of capitalism in shaping our society. In it students will consider both the origins and the future of capitalism. We will engage in a vibrant debate over economic systems and justice. Looking at primary sources from philosophy, politics and economics, we will trace the ideas and patterns of practice that shaped European and American economic culture from early modernity to the end of the twentieth century. How is comedy an expression of citizenship? How do we use comedy as responsible citizens in a democratic republic? This course explores the Classical foundations of comedy in the Western tradition up through our contemporary experience.

In this course, we ask the question: how do we develop the character to handle life's conflicts and tragic events? We will pursue answers to this problem through a study of ancient Greek drama and philosophy. We will read Plato and Aristotle Stoics to grapple with classical philosophical accounts of the relationship between virtue, practical reasoning, and human flourishing. We will also read four tragedies: Sophocles' Antigone and Oedipus the King, Aeschylus's Prometheus Bound, and Euripides' Hecabe. Through our study of these plays, we will explore questions concerning ethics, responsibility, and luck. We will reflect on how the study of philosophy and dramatic literature can enrich our experience and understanding of each, and how that knowledge can help move us through the deepest difficulties of life.

Society is an essential component of the human condition. But how can heterogenous populations live together as fellow citizens? In short, what does it mean to live collectively within politically self-imposed limits? We sometimes call this constitutionalism, a condition which this course investigates from a plethora of angles and through multiple disciplines. What constitutional structures will secure justice and enable human freedom and flourishing? What does it mean for individuals to have rights against the state? What are the rules, procedures, and mechanisms that ensure the protection of individual rights and responsible government, and how have they developed historically? How can political power be checked? These and other related questions, which remain relevant today, have captivated Western public life and culture since antiquity. We will examine them through a wide range of interdisciplinary sources: philosophical, legal, historical, sociological, political, and literary.

The question at the heart of this course is: what does it mean to be free and equal? What are the origins of our modern sense of justice, and how did individuals confront powerful and sometimes tyrannical leaders and institutions with new concepts of freedom? When did people and states start to insist that they were free and that they were equal? How do those past meanings differ from our own? This multidisciplinary course considers a stretch of Western civilization's history—from the Renaissance to the Age of Democratic Revolutions—in which the values and virtues of individual and corporate liberty and equality were insisted upon by authors, artists, and statesmen. In this period there emerged a new way of social and political organization—self-government—and freedom and equality were considered necessary for self-government. This course will trace the emergence of modern conceptions of freedom and equality through reading and viewing a range of works of politics, literature, art and economics.

How does belief in God shape the way one views the natural world? This course considers the relationship of thinking about God and thinking about nature from classical antiquity until the early twentieth century. It addresses the history, key themes, principles, terminologies and methodologies of multiple humanities disciplines regarding the relationship of religion to science in the Western world.

In this multidisciplinary course, we will explore the long history of Western thinking about immortality in its many senses: figurative survival through memory of great deeds, personal salvation after death, elevation to status as a literal god, restoration to bodily life, and collective survival as a species. We will see how hope, scepticism and changing expectations of immortality shaped the epic poetry, philosophy, religious literature, novels, and art of the Greeks and Romans.

What does it mean to be a 'person'? How does the person relate to other people, to society, and to God? Some of the greatest writers, philosophers, poets, and artists of the Russian nineteenth century considered the questions of the revolutionary transformation of society and the restoration of faith from the standpoint of the individual person. For them, not just philosophy, but also literature, poetry, and visual art were paths to understanding the self and its purpose in the world. By considering questions of identity and appearance, activism and contemplation, reason and irrationality through seemingly prosaic themes such as fingernails, overcoats, and simple arithmetic, this course will reveal a variety of perspectives of the nature and value of human personality and ask students to reflect on their own approach to the person in the modern age.

How do leaders use rhetoric to persuade others? What role does the art of rhetoric have in the making of politics, art, and community? This course will draw from ancient and modern perspectives, looking at both philosophical explorations of rhetoric and practical examples of it. We will begin with the Greek and Roman world, looking to examples of speeches from Homer and Thucydides, as well as critiques and defenses of the art of rhetoric from Plato to Aristotle to Cicero. We will then read famous instances of rhetoric in modern literary and political contexts, from Shakespeare's historical plays to American presidential oratory, to try to discern what is timeless about the art of rhetoric. Throughout, we will ponder what role persuasion plays in our own lives, and what role it should play.

What is the place of feeling in modern life? What is the value of desiring things we can never have, or mourning things we have already lost? Can even positive experiences of love, longing, and awe create a 'storm'? And can negative emotions like fear, dread, and confusion have a positive meaning? These are questions raised by the Romantic movement, which this course will survey in literature, philosophy, and the arts.

1 Request for permanent course number submitted to SCNS.

The United States of America has been described as the first nation in the world founded on a creed—a set of beliefs and ideas—rather than the more customary national origins of ethnicity and territory (or “blood and soil”) prevalent in the eighteenth century. It is this unique national nativity that is sometimes regarded as a foundation of the concept of “American exceptionalism.” This sense of creedalism continues to be a defining feature of the American identity, even if its particular features and meanings remain much debated—as they always have been. Thus the animating question for this course: what are the primary beliefs and ideas that shaped the United States at its birth, throughout its history, and into the twenty-first century? Ideas are also inseparable from the people who hold them and advance them. Who are some of the most notable and influential Americans who have developed, even in some cases personified, these ideas? How do they relate, if at all, to the American character and identity over time, and now in our contemporary moment? Using a combination of primary documents, core texts, and secondary readings, this multidisciplinary course will profile a series of ideas and the people who embodied them to trace the development of the United States itself.

1 Request for permanent course number submitted to SCNS.

Today, we live in a world which, for perhaps the first time in human history contains—officially at least—no empires. Yet less than 75 years ago, in the middle of the twentieth century, they suddenly disappeared throughout the world. How can we explain this transformation? What is the nature of the political world in which we now live? How is it so different to those that have come before – and why? What does it mean for a political community to be independent? This multidisciplinary course considers a stretch in the history of Western civilization—from the age of Imperialism to the era of global decolonization—in which a world inhabited by empires was replaced by one of nation-states.

realities and fortunes? While today we are more aware than ever of the pressures posed by limited resources, fragile ecosystems, and rapidly changing climates, the history of political thought reveals a long-standing awareness of the interdependence between nature, the political edifice and the mediating force of technological development. By tracing out a series of core concepts, this course surveys a series of complex dynamics of dependence, control, crisis, and escape, that govern the interplay between man and his environment. The interdependence of the natural world, the artificial world we create, and the political edifice, often appears as a puzzle: how should we approach nature? What power, if any, does it hold over us? What is the role of artifice and technology in producing and mediating society's most pressing challenges? How ought we reconcile our dependence upon nature with the desire and need to control certain forces of nature? If today we are more aware than ever of our own impact on our environment, a much longer tradition pays testament to the fact that this complex interplay is a two-way street. Man is, and continues to be, shaped in imperceptible ways by the technologies he produces, as these work with and on nature. This course excavates this rich tradition of social and political texts, through four distinct units that trace this relationship up to the contemporary moment. It offers students an opportunity to gain a wider appreciation of the historical contours of these pressing questions, as well as a in a secular age offer new opportunities and challenges for the perennial human quest for meaning? This multi-disciplinary course tackles these fundamental questions. Drawing on philosophy, sociology, and political science, we will examine three senses of secularity. The first is a political sense, where religion is largely if not entirely removed from public life, as is the case in many modern liberal democracies. The second sense of secularity is sociological, and it is identified with a situation in which there has been significant decline in religious belief and practice (recently discussed in terms of the rise of the "nones," that is, those who answer "none" when asked for their religious affiliation). The third sense of secularity is an existential sense, where it has to do with a change in the circumstances of the human quest for meaning, namely, where there has been a move from a condition in which a traditional religious outlook was taken for granted to one where it is regarded as one option among others. This third sense of secularity will be our primary focus, though we will also be concerned with its relationship to the other two senses of secularity. In exploring the existential (or lived) sense of secularity, we will examine philosophical writings on meaning in life from religious, secular, and spiritual-but-non-religious perspectives, seeking to understand what makes for a worthwhile life. Finally, we will explore how secularization has influenced politics today on both sides of the political spectrum and consider what role spirituality

This course examines what would the ideal society look like? Should we try to imagine a perfect world? The act of imagining a perfect world has been a source of both literary and political inspiration, from Plato's Republic to the present day. Utopias allow their authors to create alternate worlds, free of constraints of scarcity, gender, customs, science or even human nature. Ever since Thomas More coined the term 'utopia', based on the Greek for 'no place', utopian writing has entailed ambiguities. Are these truly 'no places', impossible to implement in reality, or 'good places', which we might aim to bring into being? Utopian writing also poses dangers: there is a fine line between utopia and dystopia, and the quest for perfection can also lead to violence and coercion. But for better or for worse, the history of utopia and dystopia is a fascinating story of human experiment and creativity.

How does war shape the human condition? In the present era, Western countries are generally sheltered from war. But this is an anomaly. Most human societies have had to reckon with war and grapple with its effects. Moreover, they have tended to regard this reckoning as important for developing their own way of life. Without that reckoning, their societies might atrophy, ossify, and slide into decadence. The resurgence of concerns about the potential for open warfare between China, Russia, and the United States demonstrates the need to consider war's effects and the persistent questions its possibility poses for human societies. This discussion-driven course explores war's effects on the human condition through a variety of disciplines and approaches. To study these effects we draw from philosophy, literature, ancient and modern history, and illustrate these effects through a number of literary sources, including drama, novels, memoirs, and film.

This course traces the changing ideal of democracy from ancient Athens to the present day, drawing on classic works by Plato, Aristotle, Rousseau, Tocqueville, Marx and Arendt. It studies the development of this idea over time and charts the dizzying variety of meanings that have been assigned to it, while engaging with the arguments of its sharpest and most perceptive critics.

This course explores the concept of the common good, as articulated in philosophy and illustrated in drama, literature, and film. We begin by studying the blueprint for a concept of the common good that Aristotle sets out in the Politics and Nicomachean Ethics, and its full development in St. Thomas Aquinas. Armed with this theoretical background, we apply ourselves to questions such as: how should regimes and authority figures provide for the common good through the law? What does pursuing the common good involve when the demands of justice are in tension with general beneficence? How compatible is value pluralism with the pursuit of the common good? We will read Sophocles, Lincoln, Martin Luther King, and St. Thomas More, among others, to reflect on the nature of leadership, justice, dissent, and principle, and how we can pursue the common good while remaining true to our conscience.

Who am I? This is one of the most essential questions that we ask about ourselves. What is identity and the self? Where does my identity come from and how is it formed? To what extent is it innate and to what extent is it shaped by my environment, my experiences, and my interactions with others? How does my identity change and what does it mean to live authentically? In this multidisciplinary and discussion-based course, we will explore these perennial questions by tracing the development of ideas about the self and identity in the western intellectual tradition. We will approach these questions with insights and methods drawn from multiple disciplines, including art history, history, literary studies, philosophy, and religious studies. Covering the long period from antiquity to the dawn of modernity, we will engage with multiple perspectives on these questions by analyzing philosophical works; Jewish, Christian, and Islamic religious texts; literary sources like poems, plays, and novels; historical documents like essays, autobiographies, etiquette manuals, and journals; and works of visual art.

What justifies the use of force? No democratic citizen is exempt from considering this question, but our answers are often contradictory jumbles. To gain clarity we will explore the works that laid the moral foundation for the modern way of war, from the Bible and the Iliad to the thought of Karl Marx. In this interdisciplinary course you will discuss poems, plays, films, histories, and philosophical accounts about war. Its subtitle could be "From Zeus to the Atom Bomb," because we will be traveling from the Classical to the Nuclear Age. Combining the techniques of literary studies, philosophy, history, and religious studies, we will strive to understand our own responses to arguments, works of art, visions, and fantasies about the nature of war. How have these cultural forms influenced the crucial decisions of human beings, and how do they impact our thinking now? We will also consider scientific explanations for the ubiquity and persistence of warfare, wondering whether natural science alone can explain human conflict. Lastly, we will consider if we have entered a "post-modern" phase of war, with the War in Ukraine as our object of consideration, a war documented in dizzying detail on social media.

Why spy? Spying has long been an important part of how countries relate to each other and defend themselves. But why do they do it? This course will approach this question from several different perspectives by reading stories of Cold War espionage (both fiction and nonfiction). We will examine it at a national level, asking what role intelligence plays in countries' foreign policy and international relations. We will examine it at a personal level, asking why people choose to join their countries' intelligence services, and why some people choose to spy on their own countries for foreign governments. We will also pose it skeptically, asking how we ought to think about morality and immorality in a world full of deception. Along the way, we will also consider bigger questions that the world of spy craft poses for our everyday lives. What is the role of knowledge and information in decision-making? What level of uncertainty and risk are we willing to accept when making big decisions? How can we trust that what we know is true? What did it mean to be wise and heroic in the middle ages? How do medieval European views of wisdom and heroism compare with modern views? We will explore these questions by examining different ideals of wisdom and heroism in medieval history, literature, philosophy, art, architecture, and music.

What are the principles and features of an ideal social and political order? What are there limits and drawbacks? This course examines those questions through a careful exegesis of exemplary works of utopian and dystopian fiction.

This course examines the following questions: What is the relationship between religious belief and human reason? How much of life do we attribute to prophecy, miracles and providence, and to what extents do we rely on human initiative, effort and creativity? Are the positions of faith and reason reconcilable, or in perennial conflict?

This course explores the concept of the common good, as articulated in philosophy and illustrated in drama, literature, and film. We begin by studying the blueprint for a concept of the common good that Aristotle sets out in the Politics and Nicomachean Ethics, and its full development in St. Thomas Aquinas. Armed with this theoretical background, we apply ourselves to questions such as: how should regimes and authority figures provide for the common good through the law? What does pursuing the common good involve when the demands of justice are in tension with general beneficence? How compatible is value pluralism with the pursuit of the common good? We will read Sophocles, Lincoln, Martin Luther King, and St. Thomas More, among others, to reflect on the nature of leadership, justice, dissent, and principle, and how we can pursue the common good while remaining true to our conscience.

Who am I? This is one of the most essential questions that we ask about ourselves. What is identity and the self? Where does my identity come from and how is it formed? To what extent is it innate and to what extent is it shaped by my environment, my experiences, and my interactions with others? How does my identity change and what does it mean to live authentically? In this multidisciplinary and discussion-based course, we will explore these perennial questions by tracing the development of ideas about the self and identity in the western intellectual tradition. We will approach these questions with insights and methods drawn from multiple disciplines, including art history, history, literary studies, philosophy, and religious studies. Covering the long period from antiquity to the dawn of modernity, we will engage with multiple perspectives on these questions by analyzing philosophical works; Jewish, Christian, and Islamic religious texts; literary sources like poems, plays, and novels; historical documents like essays, autobiographies, etiquette manuals, and journals; and works of visual art.

What justifies the use of force? No democratic citizen is exempt from considering this question, but our answers are often contradictory jumbles. Are we better than the Ancient Greeks and Romans? What do we owe them, and how have we surpassed their achievements? What does it mean to define ourselves as "modern" in contrast to classical antiquity? These and related questions are the focus of this course, which explores the ancient-modern dynamic in Western culture from the Renaissance through the Enlightenment. Readings will include selections from such writers and thinkers as Homer, Aristotle, Vergil, Petrarch, Erasmus, Bacon, Hobbes, Milton, Swift, and the American Founding Fathers.

What does it mean to be a liberal? In America, we regularly take our "liberal heritage" for granted, so much so that we take liberal principles—commitment to individual rights, limited government, free markets—are simply accepted as political necessities, even truisms. Many of these principles come to us from well-known British thinkers like John Locke. But theorists in the French tradition offered equally rich, distinct perspectives on these values. This course will focus on "two liberal traditions," British and French, through roughly the nineteenth century. We will study liberalism's beginnings, its evolution, and its legacy. We will explore some recurring themes across liberal thought: How do we define liberty, and under what conditions can it be protected? What is the trade-off between liberty and other values, like security, order, equality, or human progress? What is the relationship between economic and political liberty? We will also ask whether the study of liberal thought can teach us anything about contemporary politics, or whether many of these ideas were specific to a given place and time.

Out of classical antiquity's wealth of Greek and Roman philosophy sprang the medieval era's varied ways of thinking about many of the same questions—the nature of justice and virtue, the good and perhaps especially law—but with the complicating, or enriching, addition of religious traditions. This course examines classes of medieval political philosophy across Christianity, Judaism and Islam, including such thinkers as Thomas Aquinas, William of Ockham, Maimonides, Averroes and al-Farabi, asking such questions as: What can we know about the good by nature? Can reason suffice for determining laws governing the common good, or do human beings need recourse to divine revelation? Is God bound by natural law, or is God's will independent of reason?

What is the relationship between politics and ethics? This course examines the core debates and concepts of politics from Western and global perspectives. Considering the contributions of ancient, medieval and modern thinkers from Greek, Jewish, Christian, and Muslim traditions, it highlights their impact on our own discussions about human nature, societal and political life, and on the interplay between religion and politics.

What makes literature particularly American, and were there identifiable American values expressed in the writings of American authors of the eighteenth and nineteenth centuries? We will read the writing of colonial through post-colonial War writers, looking at how history, literature, and civil philosophy combined in the writers of these periods who were attempting to form a sense of American identity. From Hawthorne's portrait of Puritan New England in *The Scarlet Letter*, and Stowe's anti-slavery *Uncle Tom's Cabin*, to Thoreau's *Walden* and Horatio Alger's rags to riches stories, we will examine ways in which early writers crafted a sense of American identity and community. What does it mean to "write America"? We will grapple with this question as we look for commonalities among writers of varying backgrounds, all setting individual judgment up against larger cultural forces to reveal the value of independent thinking.

Can war be just? What is a 'just cause'? The idea that war can and should be just holds a middle position between the refusal to impose any moral restraints on the waging of war (realism) and the rejection of all warfare as immoral (pacifism). Western just war theories gradually developed from the confluence of Greek philosophy, Roman Law, and the Judeo-Christian scriptural tradition. Just war theory asks two essential questions: Is the cause for going to war just (jus ad bellum)? And, Is the conduct of the war just (jus in bello)? This multidisciplinary course surveys just war thinking from antiquity to the First World War. It includes historical case studies so that students can develop their own concepts of jus ad bellum and jus in bello.

On this course, we'll survey the history of political violence to better understand our present. We'll explore fin-de-siècle anarchism, Soviet communism, German Nazism, anti-colonial struggles, jihadism, violent extremist groups on the far left and on the far right, and more. Students will read original historical documents, familiarize themselves with social-scientific analysis, and study people they may find strange, dangerous, or evil.

1 Request for permanent course number submitted to SCNS.

What forces and factors drive international relations? What are the dangers and opportunities in world politics? Who or what are the most important institutions and actors in the global landscape? How have the answers to these questions changed over time? How has the international system evolved into its current, 21st century form, and what might the future look like? What are the insights and limitations of international relations theory, and how can aspiring policymakers best use theory without being trapped by its limitations? These are just a few of the core questions that will animate this course. This course will introduce students to the historical evolution of the international system, explore how to critically evaluate the insights and limitations of theory, and help identify the factors that shape the actions of state and non-state actors.

1 Request for permanent course number submitted to SCNS.

What is the relationship between morality and policy? In the statecraft of international affairs, is it enough to develop effective policies, or should they be ethical policies as well? If so, what are the foundations of ethics in foreign policy, and how do ethical considerations apply in particular issues and situations? This course will examine the normative questions of international relations and challenge students to consider what those questions mean for our conduct as citizens and as aspiring policymakers.

1 Request for permanent course number submitted to SCNS.

This course examines core debates and perspectives on the nature of constitutional government, from antiquity to the present. It will begin with an examination of contemporary constitutional controversies in America, France, and Israel. It will then examine how great thinkers and practitioners have sought to define (and defend) constitutional government. The course will study various differing and sometimes clashing views among these writers and practitioners about the political and legal arrangements most conducive to constitutional government. Perspectives to be considered include: Aristotle and Xenophon on the constitutions of Greek cities, Isaac Abarbanel on the constitution of ancient Israel, John Locke and Montesquieu on the executive, the separation of powers, and the danger of tyranny, Edmund Burke and Madame de Staël on constitutional monarchy, and the views of constitutionalism at the American founding expressed by Federalists, anti-Federalists, and Thomas Paine.

1 Request for permanent course number submitted to SCNS.

How do governments manage their scarce resources while pursuing a broad array of ambitions? How can policymakers utilize different types of power (cultural, economic, military and the like) to achieve their goals both effectively and efficiently? In a rapidly evolving and intricate world, how can leaders discern short-term and long-term priorities, opportunities, and threats? The key to addressing these issues is the concept of strategy—which is about aligning objectives with the resources at hand—and statecraft, which is the art and practice of managing the nation’s affairs.

1 Request for permanent course number submitted to SCNS.

Is there such a thing as global justice? In this course, we will explore some of the ethical problems associated with international politics. Do we have responsibilities to people beyond our own borders? What, if anything, do we owe the world’s poor? Should we find global inequality morally troubling? Should we open our borders to those escaping war and persecution? Under what conditions—if any—should Western governments intervene to prevent human rights abuses or mistreatment in other sovereign states? Which norms or standards of justice can we invoke in responding to these questions? In Part I of the course, will consider these questions (among others) by examining theoretical approaches to global justice, including discussions of human rights, Rawls’ “law of peoples,” and human capabilities. In Part II, we will discuss these questions in terms of ongoing debates in international politics: poverty and inequality, immigration and the status of refugees, and the ethics of intervention.

1 Request for permanent course number submitted to SCNS.

This course discusses scientific and technological advances in the science of food. How does modern science improve the food we eat? Relying on the disciplines of food science, food engineering, and linguistics, the course investigates and reflects on how modern science is being used to improve the health of our bodies and our planet. Topics include modern technologies such as artificial intelligence and the cognitive science of taste and food language. These themes are represented on an international level, with national and regional examples presented for classroom discussions and activities.

[illegible]

Language technology has a profound influence on the way ordinary people use language. This course explains what language technology is and why it is available for about 1% of the world's languages. Along the way, we will attempt to answer a big pressing question for our society: Can artificial intelligence be inclusive of all ways of speaking all languages?

This course is a humanities course based on critical thinking and discussion of the art, architecture, music, and gardens of Italian Renaissance Italy. This course will provide instruction in the history, key themes, principles, terminology, and theory or methodologies within the time period of approximately 1330 AD-1550 AD. Students will learn to identify and analyze the key elements, biases, and influences of art, music, and architecture with emphasis on mathematical principles, in this period of Western civilization.

Genomics has exploded with exciting discoveries and spanned new technological developments. Personal genomics and personalized health care are now a reality – it's possible and affordable to have your genome scanned. This course investigates the same fundamental questions while using the same approaches and techniques as scientists who study genetics, behavior, and disease. These pressing questions include: What does genetics tell us about ourselves? How do we study and analyze our personal genome data? How can common genetic variations inform our decisions about disease risk, lifestyles, and behaviors? We will delve into the field of genomics, learn how genome sequence data is obtained and analyzed, the limitations of that data, the ethical, legal and societal implications of that data, and most importantly, to increase scientific literacy, we will explore human genome data in a semester-long, guided research project. This course will equip students with basic skills in how to manage datasets, compose statistics, and provide meaningful analysis of genomic data using tables and charts. The concepts learned can connect to other fields, adding to students' "toolbox" of professional and scientific skills. All majors and interests complement this course. No prior scientific or statistical/analytical background is assumed.

This course will make students aware of the importance of the diversity of microbes and the significance in our everyday lives. Different microbes are explored in readings, audiovisual materials, and hands-on explorations. Topics include viruses, bacteria, parasites and fungi, microbes and art, bioterrorism, GMOs and biotechnology, food production and the role of microbes in agriculture. Issues like disease spread and prevention, vaccines and drug resistance will be examined.

Students in this course will examine texts that composers set to music, identify elements in the text that influence the ways those texts are set to music, explore what the poet and composer were trying to express, and evaluate whether the musical settings of text are successful. Students will learn how to interpret the meaning of both the text and music, what poets and composers were attempting to convey through their art, and what that means for us as the audience for that art.

This course will address the essential question of "Who are we in relation to the natural world?" Sound is integral to the way we as humans engage with the world around us, from the soundworlds of animals and plants to those of human creativity and technology. In this course, we use music and sound as a way to understand the urgency of current issues in environmentalism and ecology, which in the 21st century has been expressed through a welcome explosion of younger activists raising their voices. Using listening as an ethical practice, we will explore music from the popular to the experimental. We will hear sounds from around the globe, as well as our personal and community soundscapes. Drawing on recent themes in the growing field of ecomusicology, such as deep ecology, eco-feminism, spirituality, and indigeneity, we will seek to deepen our understanding of how we relate to the environment as ethical creatures, and become more aware of the central place of sound and the environment in our lives.

The twentieth century saw the creation of physical music media (such as phonographs, long playing records, cassette tapes) that changed the way we listen to, participate in, understand, and engage with musicmaking. Questions around reproduction, how they affect concepts of the voice and body, the hauntological, issues around labor, and the audiovisual litany grew as media changed and adopted. The move to digital media (mp3 files, streaming music, digital music platforms such as Bandcamp, SoundCloud, and YouTube) only enhanced these questions and concerns. This course will examine the current state of musicmaking in regard to the digital, computational, legal, and ethical. This course will take an interdisciplinary approach to questions around music making and its myriad meanings in a digital age. Through readings and discussion, we will examine who gets left out of conversations around creation, who may be harmed, and how this new mediated way of listening may disturb how we understand music forever.

In this class we will discover plants as nature’s powerhouse of chemical diversity. In fighting some of humankind’s deadliest medical conditions including cancers, heart diseases, and pain. The class is centered around the question of “can we explore plants for human medicine to address current societal health problems?”. Childhood leukemia is treated with vincristine and vinblastine drugs derived from Madagascar periwinkle plant, anti-chemotherapeutic drug taxol was first isolated from bark of pacific yew trees, opioids such as morphine and codeine are derived from opium poppy plants, etc., Several such discoveries have led to Nobel Prizes in Physiology or Medicine since they have impacted millions of lives across the globe.

In the past few years, the capabilities of AI-based systems have grown explosively due to the development of a new technology, large language models. These systems, known informally as “chatbots,” are trained on a significant portion of the text and images that humanity has collectively produced over centuries. As a result, they have developed the ability to perform tasks that we normally associate with human-level intelligence, such as writing essays, writing computer programs, and passing graduate-level exams. In this course, we will explore the philosophical and social implications of this powerful new technology. This course will engage with research from several academic disciplines, including computer science, psychology, philosophy, and economics.

What is the universe and what is humanity’s place in it? This is one of the fundamental questions that people have always asked, and we are still asking it. This course will explore humanity’s view of terrestrial and celestial phenomena from ancient to modern times, and in parallel offer basic explanations for how science views these phenomena today. Topics include the solar system and how various civilizations and eras have conceived of its structure, light and relativity, and modern concepts of cosmology.

In this course, students will examine American public opinion and explore survey data collection, polling procedures, attitude measurement, and survey research implications. This class takes a multidisciplinary approach and uses scientific data analysis to address contemporary issues in the United States—not limited to standard subjects such as an election or election candidates. Students will engage with public opinion survey data to determine the role of liberal-conservative ideology, partisan affiliation, socioeconomic and demographic characteristics, and religiosity in shaping opinions (among other characteristics).

This course seeks to understand our engagement with the information and messages we encounter through our media landscape, including focus on perceptions of truth, public discourse, and the “social” self. We will especially probe the questions that arise in our efforts to make sense of digital environments and the human quest for understanding in social spheres like politics, journalism, religion, education, and more. We will explore the tools of media literacy to wade through information overflow and mis/dis-information.

This class will introduce students to a variety of leadership styles—from a diverse range of national and international public figures, scholars, and theorists all of whom have drawn on mindfulness, intentionality, spirituality, non-violence, social justice, and compassion as informing their leadership strategy. This class will provide a toolkit of leadership style from various social and behavioral science disciplines to explore, evaluate, and discern between leading authentically and selling your soul.

We are accustomed to thinking about the importance of the Holocaust, itself, as a specific event in time, but it was also a historical event with enduring consequences for American culture and society. In this class, we'll be looking at some of the aspects of culture that the Holocaust affected, such as attitudes toward antisemitism; the treatment of minority groups in the US; the place of survivors and witnesses in American culture; and the stories that Comic books tell.

The problem of evil has been a focus of intense reflection by philosophers, theologians, psychologists, and novelists. Students will address this key theme in the human condition in this course. The class will enable students to analyze this question in a written form and orally by drawing on a variety of methodologies from different fields in the humanities including philosophy, religion, history, and art. Students will not only read and analyze classical texts such as the biblical book of Job, as well modern interpretation of classical themes in TV shows such as Good Omens. The case studies examined, historical and contemporary alike, including Egypt in antiquity, Italy of the Middle Ages, and twentieth century Germany and France.

This course uses 20th and 21st century Latin American pop culture (television, film, music, and visual arts) and a variety of texts, both written and visual, to identify, describe and explain pressing questions regarding the scope of human fictions. This course will center in analyzing fictions which stage the political and socioeconomic associations of ethnic groups in regions dominated by Hispanic elites. This course engages students in the critical examination of empirical data, oral history, maps, and chronologies using a multi-disciplinary approach garnered from history, sociology, cultural studies, and political sciences. Students will scrutinize the complexities of Latin American societies by evaluating the expansion of democracy and citizenship rights, and responses to abuses of human rights, corruption, and violence. They will compare the data with pieces of Latin American pop culture to understand how fiction portrays, imbeds, or questions stereotypes, prejudice, and racism into shared fictions. Major topics include the formation of modern states, race and ethnicity, external actors, political regimes and democracy, civil rights, and neoextractivism.

This course is intended to introduce general ideas involving probability and statistics through thought provoking examples from subject areas in the physical and biological sciences. Students will be expected to think through solutions to problems from the various cases to understand the various statistical methods introduced. This can lead to questions such as how can we measure and describe climate change based on available empirical data? The course will focus on "big picture" uses of statistical methods and will use statistical computing software as opposed to "hand calculation."

In this course, students will explore these questions by focusing on the data analytics revolution in sports and determine if the lessons learned in that field can be applied to their own daily decision making. Students will investigate if the decision-making processes used in sports, such as how players and coaches make high stake decisions in sports-related activities, are similar to the procedures used by people and companies' to make daily decisions and judgements.

To study the connection between oil and plants, we will reexamine debates on car culture, agriculture, productivity, and more. This course is not about the science of climate change. We will look at the different ways that the arts, humanities, and sciences think about plants and oil. We will learn about calls for justice in the context of state-managed energy policy that facilitates the burning of fossil fuels (energopower, like biopower but focused on energy and not life). We will compare our personal habits with those of other people across our planet. Through introspection and reflection on our dependence on plants and oil, students will hone their personal energy ethic and become newly conscious plantbased petrocitizens in times of climate change.

Humans’ impact on the Earth is so profound that a new geological epoch - the Anthropocene - has begun. Human decisions often have unintended effects on the environment. For example, Indonesia government jeopardized the conservation efforts of the Javan hawk eagle by declaring it a National Rare animal. In another example, subsidies that promote energy-efficient appliances often backfire by increasing energy consumption and greenhouse gas emissions. Why did these unintended consequences happen? How can we better predict and prevent them? To answer these questions, we will seek to explore the complex relationships between humans and the environment using a systems approach.

This course introduces philosophical, sociocultural, and psychological approaches to the study of wisdom and provides an overview of the different ways wisdom has been defined, conceptualized, and assessed in Western and Eastern cultures. We will discuss how wisdom is related to emotions, morality, spirituality, and personality and how it fosters human flourishing. We will learn how wisdom might develop and explore the benefits of wisdom for individuals in organizations and for society at large. We will investigate the role of wisdom in the social and political sphere and conclude by speculating how wisdom might be nurtured and taught.

This is a US-based wildlife and environmental law course designed to teach you about the pressing legal issues concerning fish and wildlife conservation law and policies. This course will cross disciplinary boundaries dealing with biological, ecological, criminological, historical, and legal issues.

1 Request for permanent course number submitted to SCNS.  
1 Sent SCNS update of course description based upon Articulation Committee description

Through a multidisciplinary framework of art, music, history, city planning, urban design, and storytelling, course seeks to address two fundamental questions: 1) How does place work to construct individual and collective identities? and, 2) How do collective identities, as expressed through place-based narratives, function to empower and unite communities? Students will be exposed to different narrative methods of expression, such as oral histories, stories and storytelling, film, music, and art. Beginning with an examination of the theoretical and philosophical underpinnings of place attachment, cognitive architecture, and the sacrality of everyday spaces, students will explore how individual identities are shaped and transformed by space. Then, the course builds to examine the spatial intersectionality of the individual and community. Finally, the course concludes with an investigation of how community identities are formed and expressed through narratives.

This course explores the connections between wildlife and human health to address the pressing question: Why does nearly 50% of newly emerging infectious diseases in people originate in wildlife and what can we do about it? Relying on the disciplines of wildlife ecology and conservation, veterinary medicine, public health, and global change biology, the course investigates and reflects on the contemporary biodiversity crisis, sustainability, environmental justice, and approaches to complex problems.

## Certification Form

### Academic Year 2025-26 General Education Courses

Please email signed form to [Articulation@fldoe.org](mailto:Articulation@fldoe.org) no later than September 1, 2024.

Dear Commissioner Diaz,

I certify that my institution has reviewed our general education course options for compliance with sections 1007.24, 1007.25, and 1007.55, Florida Statutes.

- X Reviewed Excel spreadsheet provided by the Office of K-20 Articulation.
- X Submitted new courses or changes to the Statewide Course Numbering System (SCNS).

**COMMITTEE ON FINANCE, STRATEGIC PLANNING  
AND PERFORMANCE METRICS  
ACTION ITEM FSPPM1  
October 3, 2024**

**SUBJECT:** FY2024-25 Carryforward Spending Plan

---

**BACKGROUND INFORMATION**

The Board of Trustees is requested to approve the University's FY2024-25 Carryforward Spending Plan. Pursuant to Board of Governors (BOG) regulation, a Carryforward Spending Plan is to be submitted annually by the University to the Board of Trustees for approval.

In addition to maintaining a 7% Statutory Reserve, Carryforward funds are directed towards several strategic priorities.

Once approved by the University Board of Trustees the Carryforward Spending Plan is to be submitted to the Board of Governors, along with a certification signed by the BOT Chair, the President and the CFO. The Board will consider each university plan based on its own merits and how it addresses the strategic priorities. Follow-up reporting will be required.

**PROPOSED COMMITTEE ACTION**

The Committee on Finance, Strategic Planning and Performance Metrics is asked to approve the University's FY2024-25 Carryforward Spending Plan for recommendation to the Board of Trustees for approval on the Consent Agenda and for submission by the University of Florida to the BOG for final approval.

**ADDITIONAL COMMITTEE CONSIDERATIONS**

Board of Governors approval is required.

2024-2025 Carryforward Spending Plan Summary

Approved by University Board of Trustees

Balances and Spending Plans as of July 1, 2024

	University E&G	IFAS	Health Science Center	Grand Total : University Summary
2. 2024 House Bill 707 amended 1011.45 F.S. regarding university Education & General carryforward minimum reserve balances, reporting requirements, and allowable uses. 1011.45(1) states that "Each university shall maintain a minimum carry forward balance in of at least 7 percent of its state operating budget; however, a university may retain and report to the Board of Governors an annual reserve balance exceeding that amount. The spending plan shall be submitted to the university's board of trustees for review, approval, or if necessary, amendment by September 1, 2020, and each September 1 board of trustees for review, approval, or if necessary, amendment by September 1, 2020, and each September 1 thereafter. The Board of Governors shall review, approve, and amend if necessary, each university's carry forward spending plan by October 1, 2020, and each October 1 thereafter." 1011.45(3) adds "A university's carry forward spending plan must include the estimated cost per planned expenditure and a timeline for completion of the expenditure." Three additional tabs are provided with this file to allow reporting of university detailed expenditure plans for each planned expenditure or project, a completion timeline, and amount budgeted for expenditure during the reporting fiscal year.

University of Florida

2024-2025 University E&G Carryforward Spending Plans - Supplemental Details (Fixed Capital Outlay Plans)

Pursuant to 1011.45, Florida Statutes

July 1, 2024

Line Item #	Carryforward Spending Plan Category	Specific Project Title/Name	Project Description	Amount of July 1, 2024, E&G Carryforward Operating Balance Provided to FCO Project <sup>2</sup> (E+G)	Restricted	Committed	Carryforward Expenditure Timeline			Comments/Explanations
					Restricted Balance As of July 1, 2024	Committed Balance As of July 1, 2024	Total # Years of Expenditure per Project	Current Expenditure Year #	Estimated Completion Date (Fiscal Year)	
Small Carryforward Projects <sup>1</sup>										
1	Small<\$2M: Demolition of Educational Facilities & Site Improvements	IF23195-B0443-Demolition	B0443 Demolish - AG-ANIMAL SCIENCES-DRU-Hague- The building is deteriorated beyond repair. This project will include demolition of the existing structure and components and includes minor sitework to improve the open space.	\$12,871	\$12,871	\$0	1	1	2025	
2	Small<\$2M: Demolition of Educational Facilities & Site Improvements	IF23244-Hurricane Idalia-B8332 Seed Building Storage DEMO	B8332-NFREC-SV-Live Oak- Seed Storage Building- Roof of structure, interior of storage building and potentially other structural members damaged by Hurricane Idalia. This project will be to demo IFAS FPO is working with Ms. Bob Hochmuth to ensure any replacement structure meets the needs of the research mission at NFREC-SV.	\$10,000	\$10,000	\$0	1	1	2025	
3	Small<\$2M: Demolition of Educational Facilities & Site Improvements	IF23246-B8310 Fertilizer Storage Building Demo	B8310-NFREC-SV-Live Oak- Fertilizer Storage Building- Roof of structure, column and interior of storage building and potentially other structural members damaged by Hurricane Idalia. Additionally, a storm in May 2024 completely tore back the remaining roof that was structurally sound. This project will be to demo the storage building so that new planning for fertilizer storage space can be secured.	\$40,000	\$40,000	\$0	1	1	2025	
4	Small<\$2M: Demolition of Educational Facilities & Site Improvements	IF24077-B0846 Demo	B0846-HS-Gainesville. Project will include demolition of existing building which has deteriorated beyond repairs.	\$20,000	\$20,000	\$0	1	1	2025	
5	Small<\$2M: Demolition of Educational Facilities & Site Improvements	IF24078-B0847 Demo	B0847-HS-Gainesville-Project will include demolition of existing building which has deteriorated beyond repairs.	\$15,000	\$15,000	\$0	1	1	2025	
6	Small<\$2M: Demolition of Educational Facilities & Site Improvements	IF24085-B8312 Demo of Farm administration building	B8312- Office Lab Building - NFREC-Live Oak REC Suwanee Valley- This project will be to abate and demo the current building that is occupied by the Farm administration personnel. The building has become unusable because of structural issues caused by extensive termite damage over the years. Repairs are not feasible and occupancy of this structure is a safety concern.	\$30,000	\$30,000	\$0	1	1	2025	
7	Small<\$2M: Demolition of Educational Facilities & Site Improvements	IF24112-B2285-Demolition and Site Improvements	B2285-Ordway Swisher-Melrose-Project will include abatement of materials identified in hazardous materials survey, removal of selected items for future use and demolish remaining building. Make site improvements for possible future building on the same site.	\$150,000	\$150,000	\$0	1	1	2025	
8	Small<\$2M: Demolition of Educational Facilities & Site Improvements	IF24116-B7220-Grad Residence Demo	B7220-ESC-Lowell-Project will include demolition and removal from the premises of existing mobile home grad residence. The building has deteriorated beyond repairs.	\$10,000	\$10,000	\$0	1	1	2025

74	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF23162-Hurricane Nicole-Apopka-B4016 Repair Shade Cloth	(ILAP=IFAS Leadership Approved Project) B8470- REC- Jay - Removal of existing Control system(s), Sensors, weather station/ and outdoor sensor set. Complete Installation of the MicroGrow control, interface cabinet, sensors, Growlink software and web alarm. Testing, setup of all Microgrow components, training of staff. IFAS FPO is coordinating with the WFREC Department specifically Dr. Unruh Bryan.	\$4,500	\$4,500	\$0	1	1	2025
75	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF23164-Building 7518-Roof Screw Replacement	B4016-Mid Florida REC-Apopka-Project will include installation of new Aluminet and 800sft of shade cloth that were damaged by Hurricane Nicole.	\$2,965	\$2,965	\$0	1	1	2025
76	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF23175-S0120-State Deferred Maintenance-Roadway, Drainage and Bridge Repairs	B7518-PSREU-Citra-Project will include replacement of all metal roof screws and rubber washer with new painted oversized roof screws with rubber washers. IFAS FPO is coordinating with Jim Boyer from Citra for funding.	\$8,380	\$8,380	\$0	1	1	2025
76	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF23178-B9342-State Deferred Maintenance-Timpoochee Building Repairs	S0120-Santa Fe River BRU-Alachua-This project will include drainage corrections, roadway and bridge repairs.	\$9,442	\$9,442	\$0	1	1	2025
			B9342-4H Camp Timpoochee-Niceville-This project will include repairs to this building at the 4H Camp Timpoochee site. Repairs could include building envelope, roofing, gutters, downspouts, etc.						

77	Small <\$2M: Renovation, Repair or Maintenance	IF23184-B0459-Room 0233 Conference Room Renovation	B0459 Room 0233 Conference Room Renovation-AG-ANIMAL SCIENCES, Gainesville - The Animal Science Department is requesting a modification be made to room 233 to create additional space for a small conference room. They are asking for the construction of a new wall to separate a section on the west side of the room for this purpose. The proposed wall location will utilize 195 square feet from the 358 total square feet of the room. The work will consist of building a new metal stud/sheetrock wall with an entrance door, making minor alterations to the suspended ceiling layout, and installing electrical outlets and light switches per code requirements.	\$3,405	\$3,405	\$0	1	1	2025
78	Small <\$2M: Renovation, Repair or Maintenance	IF23187-B7510-Gutter Downspout Replacement (ILAP)	B7510-PSREU-Citra-Project will include removal of existing metal down spouts and replace with new down spouts. Seal all connections. (ILAP = IFAS leadership approved project).	\$3,025	\$3,025	\$0	1	1	2025
79	Small <\$2M: Renovation, Repair or Maintenance	IF23188-B7519-Gutter and Downspout Replacement (ILAP)	B7519-PSREU-Citra-Project will include removal and replacement of existing metal down spouts on building and sealing all connections. (ILAP=IFAS Leadership Approved Project).	\$3,025	\$3,025	\$0	1	1	2025
80	Small <\$2M: Renovation, Repair or Maintenance	IF23189-B0479 - Replace Roof	B0479 - AG-Fisheries / Aquatic Sciences - The roof shingles have become old and deteriorated to the point of needing to be replaced. This project will be used for the roofing maintenance on the entire structure (5,003 GSF). The work will include - Removing the existing roof material to the exposed plywood decking and repair rotten wood as needed. Installing underlayment, pipe flashings, eave drip flashings, ridge vents and architectural shingles. All work will be reviewed and inspected by EH&S for Code compliance.	\$45,307	\$45,307	\$0	1	1	2025
81	Small <\$2M: Renovation, Repair or Maintenance	IF23203-B7164-Repair hail damage.	B7164-CREC-Lake Alfred-Repair the damage caused by a hailstorm on May 6th.	\$7,248	\$7,248	\$0	1	1	2025
82	Small <\$2M: Renovation, Repair or Maintenance	IF23210-B5235-Hurricane Ian Repairs	B5235-GCREC-Balm-Replace polyvinyl roof covering, sides and ends removed due to damages caused by Hurricane Ian.	\$10,016	\$10,016	\$0	1	1	2025
83	Small <\$2M: Renovation, Repair or Maintenance	IF23211-B0496 - McCarty Hall B - Renovate Study/Computer Room1122	B0496 - AG-FOOD / RESOURCES ECONOMICS-This project will be used to update the student study room 1122. An asbestos flooring abatement is required and will be performed prior to any work being done. The work will include new carpet, painting, and removing and infilling the pass-through door leading over to room 1120. The department is working with OEC Business Interiors to provide office cubicles to accommodate 6 student workstations. A base power infeed (electrical junction box) will be installed to power the new cubicle workstations. New network cabling will also be installed to service the workstations.	\$2,318	\$2,318	\$0	1	1	2025
84	Small <\$2M: Renovation, Repair or Maintenance	IF23213-B8027-Renovation	B8027-NFREC-Marianna-The maintenance shop will be renovated to and update offices walls and other functional modernizations, including break space and repairs that are needed in order to allow for a modern and up to date appearance. IFAS FPO will be the lead in the project efforts and the REC will be providing reviews and selection of colors and other administrative assistance as the end user.	\$66,380	\$66,380	\$0	1	1	2025
85	Small <\$2M: Renovation, Repair or Maintenance	IF23224-B8333-Washer Dryer Infrastructure Installation	B8333-SVREC-Live Oak- Equipment Building- Washer and Dryer Infrastructure addition. This project will be to add to the existing water and electric infrastructure to allow for the laundering of event linens. This will allow for a more expeditious manner in which events will be set up. Currently they are being taken to a local laundry mat. There is a current WO#2913723 for this project request. The FPO is currently working with Ms. Kimberly Glasscock Program Assistant and Ben Broughton farm manager.	\$3,000	\$3,000	\$0	1	1	2025

86	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF23231-B0480 Mold Remediation and HVAC replacement	B0480 AG- AG-SCHL FOR, FISH, & GEOMATICS - Areas of the facility have been impacted by excessive moisture intrusion because of an old failing HVAC system. An air quality assessment, performed by EH&S, has identified mold growth on various building materials in rooms 1, 2, 3, 7 & 9, and under their guidance, a certified industrial hygienist mold work plan has been obtained from a mold decontamination consultant. A remediation will be performed by a qualified mold remediation contractor to decontaminate the mold growth on the impacted interior building material components and finishes. An HVAC replacement will be done as a corrective action for the core issue of the moisture problem, which will be the installation of a new ductless mini split system. Also, this project will be utilized as an opportunity to remove an obsolete boiler that has been sitting disconnected in room 4. The boiler has asbestos containing materials and will require an asbestos abatement to be removed. This will be done by a qualified asbestos removal contractor.	\$5,391	\$5,391	\$0	1	1	2025
87	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF23235-B8316-Maintenance Building Re-Roof	B8316-NFREC-SV- Live Oak -Maintenance Building Re-Roof - This project will be to re-roof the existing maintenance shop that exists at 7580 COUNTY ROAD 136 LIVE OAK, FL 32060. There are several places throughout the ~3,200 sq. ft. roof that have been repaired in numerous locations on the roof. The current roof leaks and has outlived its lifespan. It will be replaced with a new PBR panels 24g with a galvanized color to match the building current color.	\$15,777	\$15,777	\$0	1	1	2025
88	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF23238-B7162-Repairs and Replacement of Screen	B7162-CREC-Lake Alfred-This project will include repairs and replacement of screen on portions of the greenhouse. Existing screen has deteriorated due to age. IFAS FPO is coordinating funding with Dr. Rogers.	\$712	\$712	\$0	1	1	2025
89	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF23239-S4202-Plant Science Research and Education Unit Gutter Repairs	S4202-PSREU-Citra-This project will include pressure washing, adjusting and sealing multiple building's gutters and downspouts.	\$4,805	\$4,805	\$0	1	1	2025
90	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF23242-B8152-State Deferred Maintenance-Greenhouse Repairs to Wet Wall	B8152-RCEC-Ona-This project will complete repairs to the greenhouse wet wall. The wet wall has deteriorated due to age and wear and tear.	\$900	\$900	\$0	1	1	2025
91	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF23252-B0474-Room 0155 Packaging Lab Modifications	B0474-Ag Bio Engineering - Gainesville-This project will include modifications to existing space to accommodate new, specialized research equipment. The scope will include HVAC, processed chilled water, fume exhaust, power, lighting, lab gases, and fire protection. IFAS FPO is coordinating with Bruce Welt, Kati Migliaccio, and Terri Peterson.	\$163,349	\$163,349	\$0	1	1	2025
92	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24004-B9343-State Deferred Maintenance-Timpoochee Building Repairs	B9343-4H Camp Timpoochee-Niceville-This project will include repairs to this building at the 4H Camp Timpoochee site. Repairs could include building envelope, roofing, gutters, downspouts, etc.	\$7,058	\$7,058	\$0	1	1	2025
93	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24009-B0459-Cooler / Freezer Infrastructure and Installation	B0459-Animal Sciences-Gainesville-This project will include design and installation of electrical infrastructure required for walk-in cooler and freezer installations. The purchasing and installation of the new coolers and freezers will also be included as part of this project. The new coolers and freezers will replace those that will be demolished as part of a separate project.	\$245,985	\$245,985	\$0	1	1	2025
94	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24010-B0459-Steam Boiler Replacement	B0459-Animal Sciences-Gainesville-This project will include design and replacement of existing steam boiler systems with natural gas domestic water boiler system. The project will also include electrical modifications to remove power from the existing steam boiler system and provide power to all new systems.	\$307,935	\$307,935	\$0	1	1	2025
95	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24030-B8222 State Deferred Maintenance Greenhouse Repairs.	B8222-TREC-Homestead-Repairs to wet wall on greenhouse. The wet wall for evaporative cooling has corroded and the structural supports are failing. The repairs will fix the issues and prolong the life of the greenhouse.	\$14,000	\$14,000	\$0	1	1	2025
			This project is on the UF approved deferred maintenance list for special state funding.						

96	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24044-B8328-State Deferred Maintenance Greenhouse Repairs Live Oak	B8328-NFREC-SV- Live Oak-This project Replacement of the front door, repair of the floor drains leading to the sump, replacement of the overhead fluorescent lights with LEDs, relocation of the sump pump, rebuilding of the wet wall with aluminum framing and new polycarbonate covering, replacement of the hose bibbs, reseal gable ends.	\$9,542	\$9,542	\$0	1	1	2025
97	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24046-B7502 and 7510-Countertop Replacement	This project is on the UF approved deferred maintenance list for special state funding list. B7502 and 7510-PSREU-Citra-Remove existing counter tops, braces and under counter cabinet. Install new Corian counter tops and braces in the men's restroom, women's restroom and break area. IFAS FPO is coordinating with Jim Boyer	\$14,000	\$14,000	\$0	1	1	2025
98	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24054-B7188-Replace Bard Unit	S5301-B7188 replace existing Bard Unit with like replacement. Same power requirements. No change to MEP loads.	\$311	\$311	\$0	1	1	2025
99	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24055-S2001 - NFREC Quincy - Deer Fence	S2001-NFREC-Quincy-This project will include approximately 19000 lf of high deer fencing. The new fencing will protect research crops from damages caused by deer.	\$30,000	\$30,000	\$0	1	1	2025
100	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24057-B7514-PSREU Bee Flight Cage Conversion	B7514-PSREU-Citra-Convert the existing greenhouse into a screened in structure with multiple bays. The existing polyvinyl, lights and ventilation will be removed in the process. Greenhouse will be repurposed for bee flight research. FPO will be coordinating with Jamie Ellis regarding funding.	\$3,000	\$3,000	\$0	1	1	2025
101	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24061-B1278 - HVAC Replacement	B1278-Entomology and Nematology-Main Campus, Gainesville- This project will be for the replacement of two existing Carrier HVAC systems. The old systems are deteriorating and are no longer providing the correct airflow needed to supply the building.	\$31,500	\$31,500	\$0	1	1	2025
102	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24065-B0852- Administrative Office Renovation	B0852 - AG-FAC PLANNING / OPERATIONS - The west half of the building will be renovated to create new office space. The project will include installing a layout of new walls to accommodate four offices. Modifications will be made to the existing HVAC system, suspended ceiling, and lighting. New electrical provisions will be done, and the finishes will match the existing in the building. An entrance ramp will be installed to meet ADA compliance.	\$98,800	\$98,800	\$0	1	1	2025
103	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24071-B0833 - Replacement of Hood and HVAC System	B0833 - Ag-Food Science / Human Nutrition - Main Campus - Gainesville. We will be replacing the ducted hood with a new filtered hood eliminating the need for an outside air HVAC system. With this replacement the HVAC system will also need to be replaced removing the air handling unit out of the ceiling and installing a packaged system outside. Ducting will need to be routed outside to new packaged HVAC system as well.	\$38,220	\$38,220	\$0	1	1	2025
104	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24073-B0501 Renovation and Site Improvements	B0501-HS-Gainesville-Project will include interior renovation of building to support the Crop Transformation Center (CTC) and will also include site improvements to provide proper drainage.	\$84,500	\$84,500	\$0	1	1	2025

116	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24100-B4018 Renovation.	B4018-MREC-Apopka-Project will include renovation of greenhouse bays to include demo of old control system and add a new evaporative cooling system. IFAS FPO is coordinating with the Center Director on funding.	\$83,000	\$83,000	\$0	1	1	2025
117	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24101-B4012-Renovate Apopka rooms.	B4012-MREC-Apopka. Project will include replacing doors, new paint, new flooring, ceilings, wall coverings, HVAC and lighting. IFAS FPO is Coordinating with Dr. Stelinski, the Center Director on funding.	\$115,000	\$115,000	\$0	1	1	2025
118	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24102-S2001 - NFREC Quincy I-10 Field Pond Pump Relocation/modernization	S2001- NFREC ? Quincy ? This project is to relocate and modernize the I-10 Field Pond Pump. The primary reasoning for the relocation of the pump at the pond is that its current location is too low and floods the entire pumphouse and all infrastructure to at least 4 foot above finished floor. This consistently happens during any raining event that causes the pond to fill. Previous work to the dam was a direct result of the effect that now has the field pump/house in jeopardy each rain event.	\$10,000	\$10,000	\$0	1	1	2025
119	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24104-S2001- NFREC Quincy - Rentz Field Pivot infrastructure wiring	S2001-NFREC Quincy - Rentz Field Pivot infrastructure wiring - This project is in direct support to place the necessary wiring and all support components for the use of the newly installed irrigation pivot at the Quincy research center.	\$55,000	\$55,000	\$0	1	1	2025
120	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24105-B8025-NFREC Marianna Beef Facility Auditorium HVAC Modernization	B8025-NFREC-Marianna - Beef Facility Auditorium HVAC Modernization -This project will be to add HVAC to the beef Facility to help condition the showing room/space during beef showing events as well as other hosted community events. This project will also help to build on partnerships that currently utilize the facility.	\$25,000	\$25,000	\$0	1	1	2025
121	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24107-B116-Equipment Room Generator Addition	B0116-WEC-Gainesville, Main Campus-The project will be to intercept the electric service feed for the equipment room in building 116 connect it to a new automatic transfer switch. A circuit will be installed from the building 63 generator to the new transfer switch adding the building 116 equipment to the emergency generator system.	\$11,821	\$11,821	\$0	1	1	2025
122	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24109-B0717-Rooms 1304, 1306 and 1308 AV Upgrades	B0717-HS-Gainesville-Project will include upgraded AV systems for meeting rooms 1304, 1306, and 1308. This will include new speakers, projection screens, data, and electrical work. FPO is coordinating with Chris Gunter.	\$30,000	\$30,000	\$0	1	1	2025
123	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24113-B8701-Breakroom Cabinet Replacement	B8701 -AG-HASTINGS DEMONSTRATION UNIT-The existing breakroom cabinetry in room 0008 is worn and needs updating. The project will be used for the replacement of the cabinets, countertops and sink. Electrical work will be included to supply power for a new convection oven and minor plumbing will be done to install a filter system for an ice maker.	\$15,000	\$15,000	\$0	1	1	2025
124	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24114-B4024-Greenhouse Repairs to Room 4 Wet Wall.	B4024-MREC-Apopka-Repairs to wet wall are needed. The old supporting structure has failed due to rust and corrosion. A new support structure will be fabricated and installed.	\$27,512	\$27,512	\$0	1	1	2025
125	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24115-B0487 - Greenhouse HVAC Replacement	B0487 - Plant Pathology - Gainesville - Replace the failed outdated HVAC system with a new straight cool HVAC system.	\$3,181	\$3,181	\$0	1	1	2025
126	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24120-B0651-Demo Greenhouse	B0651-Agronomy-Gainesville-Project will include greenhouse demolition and removal of debris from premises. This greenhouse has deteriorated beyond repairs.	\$5,000	\$5,000	\$0	1	1	2025
127	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24122-B1346-Greenhouse Polyvinyl Sheeting Replacement	B1346-Agronomy-Dairy Unit-Hague-Project will include removal and replacement of the existing double polyvinyl roof, roof blowers, sidewall polyvinyl, gable end polyvinyl and gable end shade cloth.	\$15,000	\$15,000	\$0	1	1	2025

128	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24123-B8413 - Jay Well Modernization	B8413 - NFREC-Jay- This project will include repairs to existing well and also relocation of the well motor to above-ground to aid future maintenance.	\$45,705	\$45,705	\$0	1	1	2025
129	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24124-B1345-Greenhouse repairs	B1345 -AG-CENTER-AQUA / INVAS PLNTS -This project will be used to refurbish the greenhouse to its full capability by replacing or repairing the failing components. The work will include removing the existing poly roof system and replacing it with new double clear polyethylene 6-mil film with an inflator fan, replacing the existing end wall ventilation fans with new aluminum square box fans, installing new thermostats to control the fans, adjusting the roof vent system, and installing new wire rope to ensure proper operation of the vents. The project will also include the installation of new PVC irrigation piping for four new hose bibbs.	\$16,666	\$16,666	\$0	1	1	2025
130	<a href="#">Small &lt;\$2M: Renovation, Repair or Maintenance</a>	IF24125-B1281-Greenhouse Repairs	B1281-AG-CENTER-AQUA / INVAS PLNTS-This project will be used for the replacement of the faded coverings and failing components on the greenhouse. The work will include replacing the single layered poly roof and gable ends with new 6 mil film, replacing the sidewall curtains, hem pipes and clips.	\$9,000	\$9,000	\$0	1	1	2025

**COMMITTEE ON GOVERNANCE, GOVERNMENT  
RELATIONS, AND INTERNAL AFFAIRS  
ACTION ITEM GGRIA1  
October 3, 2024**

**SUBJECT:** UF Health Corporate Board Appointments-University Affiliate

---

**BACKGROUND INFORMATION**

Pursuant to University of Florida Governance Enhancements Standards, last revised by the University of Florida Board of Trustees on June 13, 2024, all appointments of Directors to University Affiliate Organizations must be approved by the University of Florida Board of Trustees.

The UF Health Corporate Board requests the following individuals be approved to the Board:

**UF Health Corporation (2)**

Greg Lewis  
Bob Stilley

**PROPOSED COMMITTEE ACTION**

The Committee on Governance, Government Relations, and Internal Affairs is asked to approve the individuals listed above, whose biographical information is in the board materials, for recommendation to the Board of Trustees for approval on the Consent Agenda.

**ADDITIONAL COMMITTEE CONSIDERATIONS**

None.

---

Supporting Documentation Included: Affiliate Appointments Summary

Submitted by: Ryan Fuller, Interim Vice President and General Counsel

**Approved by the University of Florida Board of Trustees, October 3, 2024**

---

Morteza "Mori" Hosseini, Chair

---

W. Kent Fuchs, Interim President and Corporate Secretary

**COMMITTEE ON GOVERNANCE, GOVERNMENT  
RELATIONS, AND INTERNAL AFFAIRS**

**AFFILIATE ORGANIZATION WITH BOARD APPOINTMENTS  
FOR UF BOARD OF TRUSTEES APPROVAL**

UF Health Corporation – 2

# AFFILIATE ORGANIZATION

## UF Health Corporation

<b>Name:</b>	Greg Lewis
<b>Type:</b>	Appointment
<b>Replacing:</b>	N/A
<b>Term Number:</b>	First
<b>Term Dates:</b>	10/03/2024 – 10/02/2028
<b>Length of Term:</b>	4 years
<b>Any UF Affiliates:</b>	UF Health Shands Board of Directors 2020-2024 UF Health Central Florida Board of Directors 2008 to 2024

### **Bio:**

Gregory “Greg” Lewis has served as Senior Vice President and Senior Credit Executive of United Southern Bank since 1999. He has led a team of three to provide complete underwriting and financial analysis for commercial and residential loans in support of lending teams and bank growth. He serves as a member of the Senior Management team with direct reporting to the Board of Directors.

From 1990 to 1999, he served as a commercial lender and relationship manager with First Union National Bank in Tavares, Florida. He was responsible for business development, sales and growth of a \$20 million commercial loan portfolio and customer base. He analyzed financial statements and determined prospect and customer needs; planned and delivered a full range of financial services to maximize customer satisfaction and support bank profitability. He served in the United States Air Force from 1983 to 1990 as a computer systems operator and foreign language analyst. He coordinated operations and maintenance of a Hewlett-Packard 3000 main frame ground data processing system, guided software documentation, discount storage, accountability and database integrity. He directed and supervised daily operations of the computer resource office and developed training programs. Additional responsibility included reading, translating, analyzing, and researching foreign language material as well as preparing and distributing electrical technical reports regarding intelligent summaries at a national level.

Mr. Lewis served on the UF Health Shands Board of Directors from 2020 to 2024. He has served on the UF Health Central Florida Board of Directors since 2008, serving as Chair and Finance Chair. Greg serves on the YMCA Golden Triangle since 1994, serving as Chair and Finance Chair. He served on Sunrise Arc Lake County Board from 1995 to 2004, where he served as Chair and Finance Chair. He has also served on the United Way of Lake & Sumter Counties, Junior Achievement of Central Florida and Mount Dora Area Chamber of Commerce.

Mr. Lewis attended the Community College of the Air Force, Defense Language Institute. He received his bachelor’s degree from the University of Maryland, College Park, summa cum laude.

### **Bio:**

Robert “Bob” Stilley has served as President and Chief Executive Officer of HeartCare Imaging, Inc. since its inception in 1998 bringing over twenty-five years of experience in the Diagnostic Imaging and Cardiology Industries to HCI. Through his leadership, HCI has become a leader in providing diagnostic imaging services to many of the Nation’s leading universities, physician providers, and rural hospitals. HCI has been awarded ‘Best Places to Work in Healthcare’ by Modern Healthcare for eight years, 2017-2024.

In a prior tenure, Bob was an original partner in Summit World Trade. Mr. Stilley was with Summit from 1986 to 1998 and was instrumental in Summit’s successful joint ventures with Hitachi Medical Systems of Japan and SMV of Buc, France. These joint venture companies revolutionized the diagnostic imaging marketplace through the introduction of products like ‘Open’ MRI. His tenure at Summit included roles as Vice President and President of various Summit Companies. Mr. Stilley is a member of the American Society of Nuclear Cardiology, the Society of Nuclear Medicine and a founding member of the Society of Cardiovascular Computed Technology.

Mr. Stilley is the most recent Past-Chair and presently serves as the Vice Chair of the Board of Trustees for Jupiter Medical Center and Jupiter Health in Jupiter, FL. Bob received the Trustee of the Year award in 2017 from the Florida Hospital Association for his outstanding Board work on behalf of Jupiter Medical Center. Bob served on the Florida Atlantic University Board of Trustees from 2006 – 2021. During his tenure on the FAU Board, he served as Board Chair, Vice Chair, and Chair of various board committees. Bob was awarded the FAU Presidential Service Award and Talon Award in recognition of his contributions to FAU’s success. Mr. Stilley is a past president of the Martin County Council of 100. He served on the 2022 UF Presidential Search Committee and is a member of the University of Florida Cancer Center Leadership Council. He is a lector and Eucharistic Minister at St. Jude Catholic Church in Tequesta, FL.

Bob received his degree in Business Administration from UF.

**COMMITTEE ON GOVERNANCE, GOVERNMENT  
RELATIONS, AND INTERNAL AFFAIRS  
ACTION ITEM GGRIA2  
October 3, 2024**

**SUBJECT:** Ratification of Presidency Agreement

---

**BACKGROUND INFORMATION**

On July 18, 2024, President Ben Sasse resigned as president of the University of Florida effective July 31, 2024. The UF Board of Trustees met virtually on July 23, 2024 and unanimously approved W. Kent Fuchs as the Interim President of the University of Florida with a service start date of August 1, 2024. Florida Board of Governors Regulation 1.001(5)(d) provides for the Board of Governors to confirm the selection of an interim president appointed by a university board of trustees. At the September 18, 2024 Board of Governors meeting, the Board of Governors confirmed Dr. Fuchs as Interim President subject to this Board's ratification of the Interim Presidency Agreement.

**PROPOSED COMMITTEE ACTION**

The Committee on Governance, Government Relations, and Internal Affairs is asked to approve the Interim Presidency Agreement for Dr. Fuchs for recommendation to the Board of Trustees for ratification on the Consent Agenda.

**ADDITIONAL COMMITTEE CONSIDERATIONS**

The BOG met on September 18, 2024 and unanimously confirmed the appointment of Interim President Kent Fuchs.

W. Kent Fuchs, Interim President and Corporate Secretary

**UNIVERSITY OF FLORIDA BOARD OF TRUSTEES  
INTERIM PRESIDENT EMPLOYMENT AGREEMENT**

The University of Florida Board of Trustees (the “Board”) and Kent Fuchs (“Fuchs”) hereby enter into this Interim President Employment Agreement (the “Agreement”). The Board and Fuchs may be referred to individually as a “Party” or collectively as the “Parties.”

**RECITALS**

WHEREAS, the Board has the authority to select an Interim President of University of Florida (“UF” or “the University”) pursuant to Regulation 1.001(5)(c) and (d) of the Board of Governors of the State University System of Florida (“Board of Governors”); and

WHEREAS, the Board has selected Fuchs to be delegated full authority to serve as Interim President as of August 1, 2024, subject to final confirmation by the Board of Governors; and

WHEREAS, Fuchs is ready, willing and able to serve as Interim President of UF subject to the Board of Governors confirmation of the appointment of Fuchs as Interim President to commence on August 1, 2024; and

WHEREAS, the Board has the current legal authority to determine the terms and conditions of employment of the Interim President of the University;

WHEREAS, the Board desires to commence the employment of Fuchs as Interim President on the terms and conditions provided herein and subject to confirmation by the Florida Board of Governors; and

WHEREAS, the Parties desire to memorialize the terms and conditions of Fuchs’s employment as Interim President of UF in this Agreement.

NOW THEREFORE, in consideration of the mutual promises, covenants and conditions contained herein, and other valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows:

1. Incorporation of Recitals. The foregoing recitals are true and correct and incorporated by reference into this Agreement.
2. Appointment. Under Board of Governors Regulation 1.001, the Board appoints and employs Fuchs as Interim President of UF, subject to Board of Governors ratification at its next scheduled meeting (or at any special meeting it chooses to hold prior to that) for a term commencing August 1, 2024 and ending upon the earlier of (a) July 31, 2025; (b) the start date of a permanent president of UF appointed pursuant to Florida law; or (c) the termination of this Agreement as otherwise provided pursuant to the terms herein (the “Term”). Fuchs hereby accepts such appointment and employment on the terms and conditions set forth in this Agreement, and the Regulations, Policies, and oversight of the Board of Trustees, and further understands that his/her employment as Interim President and this

Agreement is conditioned upon final confirmation by the Board of Governors.

- (a) If Fuchs is not confirmed by the Board of Governors, then the parties will return to the status quo ante and Fuchs shall be paid prorated amount of the base salary alone, for his service.
  - (b) If a new President is not in place by July 31, 2025, Fuchs and the Board Chair will work to negotiate any mutually agreeable extension of this Agreement in accordance with the Regulations of the Florida Board of Governors.
  - (c) During and subsequent the term of this Agreement, Fuchs shall retain his appointment as a tenured professor in the Department of Electrical and Computer Engineering.
- 3. Powers and Duties. During the Term of employment, Fuchs will diligently devote his full professional time, ability, and attention to the day-to-day operations of UF, including without limitation, all administrative, executive and academic functions as required by this Agreement, law, rule and regulation. Fuchs's powers and duties are as stated in the State University System of Florida Board of Governors' regulations, in Board rules, governance standards, regulations, policies and procedures, and in the laws of the State of Florida as they presently exist or may hereafter be amended and will include such other duties as may be reasonably assigned to him by the Board. As chief executive officer of UF, Fuchs shall be responsible for the oversight of all aspects of UF's activities and performance in conformance with the provisions of said regulations, governance standards, rules, policies, procedures and laws (collectively, the "Duties").
- 4. Devote Best Efforts to the Work as Interim President. Fuchs agrees to faithfully, industriously, and with maximum application of experience, ability, and talent, devote full time attention and energies to the Duties as Interim President of UF. Such Duties shall be rendered at the campus(es) of UF and such other place or places as the Board or Interim President shall deem appropriate for the interests, needs, business, or opportunity of UF.
- 5. Outside Activities. Fuchs may engage in typical charitable, civic, and professional activities of his choosing, including serving on boards of public or private corporate organizations, subject to prior approval by the Board Chair. Any and all income or other compensation earned by Fuchs from outside activities shall be paid to and retained by him, and such income or other compensation shall have no effect on the amount of salary, compensation, and benefits he is otherwise entitled to receive hereunder. Notwithstanding the foregoing, Fuchs will not be permitted to engage in any outside activities that interfere with the services required to be rendered to the University under the provisions of this Agreement, as determined by the Board; represent a conflict of interest; are otherwise adverse to the best interests of UF or individually or collectively create a conflict of commitment with his obligations under this Agreement.
- 6. Performance Goals and Incentive Compensation. Fuchs has conferred with the Board

Chair and they have together agreed up and established performance goals related to, and in furtherance of, the University's strategic plan goals, work plan and accountability report, and the Board of Governors' strategic plan and performance funding model, and other priorities as established by the Board of Trustees or the Board of Governors. The Board Chair and the President may agree to revise the goals and objectives as necessary during the year. The Board may, in its discretion and consideration of Fuchs's achievement of the performance goals, award Fuchs incentive compensation of up to fifteen percent (15%) of the annual base salary during the Term based on the achievement of the goals and objectives. Incentive compensation will be paid at the time specified by the Board or, if no specified by the Board, no later than sixty (60) days after the Term ends. A Board Committee may be designated to carry out responsibilities of the board under this section.

7. Annual Base Salary. As compensation for his/her services as Interim President, the Board shall provide Fuchs with an annual base salary of One Million and no/100 Dollars (\$1,000,000.00), paid (bi-weekly) pursuant to UF's regular employee pay schedule, less applicable taxes and withholdings. No more of this amount than is allowed by Florida Statutes shall be paid from public funds. The Interim President shall be responsible for any personal income tax liability incurred because of this Agreement or any provision herein.
8. Standard Benefits. Fuchs shall be eligible to participate in the benefits maintained by UF for executive service employees. Fuchs shall pay such premium amounts as required to be paid by other participants in executive service benefits. Such benefits may include, without limitation, health care including dental, disability and life insurance programs, retirement plans, tax-deferred savings plans, flexible spending accounts, and vacation and sick leave.
9. Housing. During the Term, Fuchs shall have full use of the Dasburg House, including as a residence, beginning no later than September 20, 2024, and UF shall cover all related costs, including utilities, housekeeping, catering, internet, security, home office equipment and services, repair and maintenance, groundskeeping, and hazard insurance.
10. Endowment. An Endowed Professorship program in the name of Kent and Linda Fuchs, in the amount of Five Million dollars to be raised by the University Foundation, Inc., shall be created by December 2024 and shall be housed in the College of Engineering, Department of Electrical and Computer Engineering.
11. Sabbatical. Fuchs shall have a post-Interim Presidency sabbatical of nine months, to be followed by retirement or a teaching assignment mutually agreed upon between Fuchs and the Board Chair.
12. Entertainment, Travel and Dues. The Board will authorize and provide for reasonable expenses incurred by Fuchs for UF-related entertainment and travel, including travel for Fuchs's spouse where attendance of same is in the best interests of UF. In addition, to further enable Fuchs to carry out the required Duties, the board shall provide the cost of annual dues and membership fees for mutually agreed to professional associations and private club memberships that

will facilitate Fuchs's performance of the Duties. The entertainment and travel expenses described in this section shall conform to the laws of the State of Florida, University regulations and policies.

13. Expense Receipts and Documentation. The Interim President agrees to maintain and furnish upon request to the Board Chair or the Chair's designee an accounting of expenses provided for in this Agreement in reasonable detail and given reasonable notice. Fuchs's Interim Presidential expenses shall be reviewed semiannually by the Office of the Chief Audit Executive and a report presented to the Audit and Compliance Committee of the Board.
14. Termination without Cause. Under UF Regulation 3.056, UF may terminate this Agreement without cause with three (3) months' notice or pay in lieu of notice. UF may terminate without cause upon a majority vote of the Board.
15. Resignation by Fuchs without Breach. In the event that Fuchs desires to resign other than because of a breach of this Agreement by UF, Fuchs may terminate this Agreement by resignation with three (3) months' written notice.
16. Termination for Cause by UF. This Agreement may also be terminated at any time for cause by UF. UF may terminate with cause upon majority vote of the Board. Cause shall mean upon the occurrence of one of the following events or actions by Fuchs:
  - a) A deliberate and actual violation of the duties set forth in this Agreement, including refusal or unwillingness to perform such duties in good faith and to the best of his abilities, after a notice and reasonable opportunity to cure; or
  - b) Any conduct that amounts to actions or omissions by the Interim President that are undertaken or omitted and are criminal or fraudulent or involve material dishonesty or moral turpitude; or
  - c) The indictment of the Interim President in a court of law for any felony or crime involving misuse or misappropriation of university resources; or
  - d) Misconduct connected with work; or
  - e) Any conduct constituting moral turpitude that would bring public disrespect, contempt, or ridicule upon UF; or
  - f) Violation of a State of Florida law, rule, regulation, or Constitutional provision, or a University rule, governance standard, regulation or policy, which violation may in the judgment of the Board adversely reflect upon and/or adversely affect UF.
17. Termination for Cause by Fuchs. In the event UF breaches the terms of this Agreement, and such breach is not cured within thirty (30) calendar days of written notice of the breach or is not a breach that may be cured, Fuchs shall have the right to

terminate this Agreement at any time thereafter upon written notice of such termination to UF.

18. Effect of Termination. Upon termination of this Agreement by UF for cause, UF is not obligated to pay any further salary, severance, benefits or perquisites. Upon termination of this Agreement by UF without cause or due to Termination for Cause by Fuchs, the Interim President will be provided the prorated payment of his annual base salary and standard benefits pursuant to section 8 of this Agreement, through the last day of the notice period.
19. General Cooperation Covenant. Without limitation of the obligations specified in this Agreement and applicable University rules, governance standards regulations, policies and procedures, Fuchs agrees to cooperate fully in any review or investigation involving University matters in which he may possess pertinent information. This obligation shall survive the expiration or earlier termination of this Agreement.
20. Severability and Waiver. If any provision or provisions of this Agreement shall be deemed invalid or unenforceable, either in whole or in part, by a court of competent jurisdiction, then this Agreement shall be deemed amended to delete or modify, as necessary, the offending provision or provisions or to alter the bounds thereof in order to render it valid and enforceable. No waiver or failure to enforce any or all rights under this Agreement by either Party on any occasion shall constitute a waiver of that Party's right to assert the same or any other rights on that or any other occasion.
21. Governing Law. This Agreement shall be interpreted and construed, and the rights and obligations of the Parties hereto shall be determined, in accordance with the laws of the State of Florida.
22. Modification of Agreement. This Agreement represents the full and complete understanding of the Parties and supersedes any previous or contemporaneous written or oral representations made by either Party. There are no other promises, understandings, obligations, inducements, undertakings, or considerations between the Parties or owed by either Party to the other that are not set forth in this Agreement. This Agreement may be modified or amended only by mutual written consent of the Parties.
23. Personal Contract. The obligations and duties of Fuchs shall be personal and not assignable or delegable in any manner whatsoever by Fuchs.
24. Understanding of the Agreement. Both Parties represent that they have thoroughly read this Agreement, that they understand it to be a binding contract, that they understand each provision, term and condition of this Agreement as well as its legal effect, and that they have signed the Agreement voluntarily and of their own free will with intention to comply with its terms.
25. Public Disclosure of the Agreement. Both Parties agree and acknowledge that this Agreement may be subject to the Florida public records law, Chapter 119, or other provisions, and may, therefore, be subject to disclosure by and in the manner provided by law.

26. Counterparts. This Agreement may be executed in multiple counterparts, each of which shall be deemed a duplicate original, but all of which taken together shall constitute one and the same instrument.
27. Headings for Convenience Only. The headings in this Agreement are for convenience only and shall not be used in construing or interpreting this Agreement.
28. Notice. Unless and until changed by a party giving written notice to the other, the addresses below shall be the addresses to which all notices required or allowed by this Agreement shall be sent:
- a. If to the University:  
Morteza "Mori" Hosseini, Chair  
c/o: UF's General Counsel's Office  
123 Tigert Hall

## INTERIM PRESIDENT PERFORMANCE GOALS

Keep the safety of UF's students and broader campus community as the top priority.

Refocus the university on enhancing its national stature and reputation, including on raising the university's overall ranking and the ranking of each of the 16 colleges and the university's hospitals.

Prepare the university for its next capital (fundraising) campaign, so the next president can quickly establish goals, themes, and launch the campaign. The last \$4.5B campaign ended in December 2022.

Accelerate progress with the university's Jacksonville graduate campus and Hamilton Center.

Fill key leadership positions that shouldn't wait for the next president, e.g., Senior Vice President for Health Affairs.

Ensure the effective establishment of the new UF Health Corporation and its relationship to academic medicine, UF Health colleges, and UF Health research institutes and centers.

Reinforce controls over administrative expenditures.

Strengthen efforts to ensure and improve student academic success.

Build on university's AI success by formulating plan for future development and implementation.

RELATIONS AND INTERNAL AFFAIRS  
ACTION ITEM GGRIA3  
October 3, 2024**

**SUBJECT:** Foreign Influence Annual Report (July 2023-June 2024)

---

**BACKGROUND INFORMATION**

Board of Governors Regulation 9.012, Foreign Influence, requires state university boards of trustees to submit all grant programs, agreements, partnerships, and contracts between the state university and foreign principals based in a foreign country of concern. Institutions must report all instances of the identified programs, agreements, partnerships, and contracts between the state university and any foreign principal in a country of concern and the expected termination date. Further, state universities must report any office, campus, or physical location used or maintained by the state university in a foreign country of concern or with a foreign principal.

The Chief Compliance, Ethics, and Privacy Officer must affirm that the Foreign Influence Annual Report (July 2023 – June 2024) has been approved by the Board of Trustees and indicate the approval date.

**PROPOSED COMMITTEE ACTION**

The Committee on Governance, Government Relations and Internal Affairs is asked to approve the UF Foreign Influence Annual Report (July 2023 – June 2024) listing all relevant relationships active during the fiscal year lasting from July 1, 2023 to June 30, 2024 as presented. The Committee is asked to recommend this item to the Board of Trustees for approval on the Consent Agenda.

**ADDITIONAL COMMITTEE CONSIDERATIONS**

Submission to the Board of Governors is required after approval by the Board of Trustees.

October 3, 2024**

**SUBJECT:** Faculty Raise Memorandum of Understanding: Collective Bargaining Agreement-United Faculty of Florida-UF Chapter

---

**BACKGROUND INFORMATION**

The University of Florida and United Faculty of Florida-UF Chapter (UFF-UF) have reached a tentative agreement to amend Article 24 of the Collective Bargaining Agreement (CBA) to provide for 2024-2025 salary increases to in-unit faculty. The amendment provides a 4.0% merit pool for salary increases.

**PROPOSED COMMITTEE ACTION**

The Committee on Governance, Government Relations, and Internal Affairs is asked to approve the tentative agreement for recommendation to the Board of Trustees for ratification on the Consent Agenda.

**ADDITIONAL COMMITTEE CONSIDERATIONS**

None.
